# OFFICE OF ADMISSIONS AND RECORDS

Annual Report  
June 1, 1956 - May 31, 1957

## INTRODUCTION

The Office of Admissions and Records has conducted general correspondence with prospective students, has passed upon credentials of students entering the colleges and schools, has supervised their entrance examinations, has had charge of matriculation and registration, has assessed tuition and fees, has kept records of all tuition and other fees of students and reported them to the Vice President and Comptroller for collection, has administered the program of undergraduate scholarships, has administered the University Exchange-Visitor Program, has conducted examinations in Illinois for the certificate of Certified Public Accountant, has certified students under Selective Service. The office has been the official depository of all academic records. In a number of graduate and professional programs, it has shared with appropriate committees and/or administrative officers responsibility for the approval of the credentials of entering students.

During the past year, the Office of Admissions and Records launched an intensive program of school and University relations with primary attention focused on improved articulation.

## CHANGES IN ADMISSION REQUIREMENTS

The Office of Admissions and Records is now administering a number of changes in general undergraduate entrance requirements which were approved during the past year. In brief, the changes stipulate (1) that beginning non-resident freshmen must rank in the upper half of their high school graduating classes, and (2) that transfer students must present a 3.0 average except that transfer students who are Illinois residents and have less than 40 semester hours with a scholarship average of 2.5 - 3.0 may petition to be admitted.

PROGRAM FOR STUDENTS WHO RANK IN THE LOWEST  
QUARTER OF THEIR HIGH SCHOOL CLASS

Students who rank in the lowest quarter of their high school class are now required to participate in a testing and interviewing program before they are issued a permit to enter the University. The testing and interviewing are conducted by the Student Counseling Bureau.

For some time Illinois students from the lowest quarter have been admitted to probationary status. This practice will be continued. Some of them have sought, prior to admission, the help they could obtain from participation in our testing and interviewing programs. The expanded program makes this testing and interviewing a requirement for admission. We believe that all students from the lowest quarter who seek admission to the University will benefit by this program. The testing and interviewing should help them decide whether they should enter the University or some other post-high school educational institution, or perhaps go directly into an occupation. Students from the lowest quarter of their high school class will not be denied the privilege of attending the University if they elect to do so following the testing and interviewing.

NEW SCHOLARSHIPS

During the past year 2,587 students held tuition waiver scholarships worth \$342,433.66. (See Table 9a). This represents an increase over the previous year of 112 scholarships with a value of \$18,164.25. The increase was fairly evenly distributed among the various kinds of tuition scholarships.

Special cash scholarships with a value of \$148,770.00 were awarded to 597 students. (See Table 9b) The average award was \$250. The previous year 612 students received cash scholarships worth \$128,000, an average of \$210 per scholarship. The average was considerably larger this year because we received, in 1956-57, a number of new scholarships of substantial value.

Included were the Hunter Scholarships which have a value of \$900 each, and five General Motors Scholarships for substantial amounts.

Funds for scholarships were made available for the first time in 1956-57 from a number of sources. The following sources provided funds for scholarships in any field of study: Armstrong Corporation, Gamma Beta Educational Charities, General Undergraduate sponsored by Business and Industry, Jeanette and Benjamin Hunter, YMCA of Chicago. Funds for scholarships for study in special areas were provided by the following: American Society of Agricultural Engineers - Agricultural Engineering, Louis Allis Company - Engineering, Barber Coleman - Engineering, Crane Company - Engineering, Alfred Crossley - Engineering, Foundry Educational Foundation - Engineering, Linde Air Products Division - Engineering, Magnavox Foundation - Engineering, Owens-Illinois Glass Company - Engineering, Western Electric - Engineering, Westinghouse Air Arm Division - Engineering, Mississippi Valley Structural Steel - Engineering & Architecture, Pennsylvania Glass Sand Corporation - Ceramic Engineering, Motorola - Industrial Design.

Each year we have a rather large number of applicants who have excellent qualifications but who cannot be provided with scholarship assistance because of our limited resources. The need for additional scholarship money is increasing with mounting enrollments and rises in the costs of University attendance.

#### MODIFICATIONS IN REGISTRATION PROCEDURES

A number of modifications in registration procedures were initiated during the past year. They included the pre-registration, for both the 1956 and the 1957 Summer Sessions, of graduate students at Urbana; the establishment at the Chicago Undergraduate Division of a complete IBM registration procedure, similar to the one used at Urbana, to supplement the partial IBM arrangements used earlier; and the mechanization of certain procedures preliminary to and following registration. A complete IBM registration procedure will be established at the Chicago Professional Colleges, in September, 1958.

## IMPROVED ARTICULATION

The University staff has long been active in many types of school and University activities through all or nearly all of its schools and colleges. During the past year a number of new activities were undertaken, with emphasis focused on improved articulation.

One development involved the appointment by the President of the University and the President of the Illinois Secondary School Principals Association of a Joint Committee on School and University Relations. Among the major recommendations of this committee during its first year of work were (1) that studies be undertaken which would provide information on why University students fail or withdraw; (2) that the high schools and the University explore means whereby the high schools can utilize University Students who were their graduates as a means of improving the high school counseling and educational programs; (3) that a committee of the Illinois Secondary School Principals Association be appointed to study the value of College Days; (4) that increased attention should be focused upon what is needed in the various secondary school courses to prepare effectively high school pupils for success at the University; (5) that the University make available to principals and to superintendents in unit systems eight-week grades for entering freshmen from their schools, semester grades until graduation for students from their schools, names of students from their schools who were placed on probation, dropped, or withdrawn and the available reasons for such action, and names of students from their schools who receive honors both for curricular and extracurricular work; and (6) that the University consider the Advanced Placement Program sponsored by the College Entrance Examination Board with a view to accepting the credit earned by superior students who have successfully passed the examinations administered by the Program.

Another development involved the initiation of a series of conferences, the first of which was held on April 29, 1957, for high school principals and counselors and University administrators, counselors, and freshmen. The conferences have been planned to enable school and University personnel to identify specific problems which University freshmen face. These problems should point to steps which the University and the high schools might take to decrease the gap between high school and University and to strengthen all phases of articulation.

# OFFICE OF ADMISSIONS AND RECORDS

Annual Report  
June 1, 1956-May 31, 1957

A summary of enrollment and related facts follows under the headings:

Total Enrollment, College Enrollment, Registration by Classes in Undergraduate Colleges, Enrollment of Men and Women, Enrollment of New Students, Geographical Distribution of Students, Undergraduate Tuition Scholarships, Students Placed on Probation or Dropped for Poor Scholarship, and Married Students.

## TOTAL ENROLLMENT

The total enrollment for each of the three divisions of the year as compared with the same divisions of the previous year has been as follows (see Tables 1, 2, and 3):

	Summer Session		First Semester		Second Semester	
	<u>1955</u>	<u>1956</u>	<u>1955-56</u>	<u>1956-57</u>	<u>1955-56</u>	<u>1956-57</u>
Urbana	5080	5411	18075	19223	17093	17704
Chicago Professional Colleges	238	273	1651	1689	1549	1583
Chicago Undergraduate Division	1100	921	4310	4135	3794	3449
Extramural Courses	<u>370</u>	<u>503</u>	<u>2635</u>	<u>2585</u>	<u>2723</u>	<u>3024</u>
Total	6788	7108	26671	27632	25159	25760

It will be seen that the total enrollment was larger this year than last year during all sessions. There were 320 more students registered in the summer, 961 more in the first semester, and 601 more in the second semester.

The total enrollment for the year (number of different students who have attended the University during any of its sessions) has been 36,447 (see Table 4). The similar figure for the preceding year was 35,076. There has been an increase since last year, therefore, of 1,371. The totals for all divisions for this year and last year (including summer session) with percentages of increase or decrease are indicated as follows:

	<u>1955-56</u>	<u>1956-57</u>	<u>% of Increase or Decrease</u>	
Urbana	22206	23331	+	5.07
Chicago Professional Colleges	1692	1751	+	3.49
Chicago Undergraduate Division	6035	5630	=	6.71
Extramural Courses	6046	6532	+	8.04
Deduct duplicates*	<u>(903)</u>	<u>(797)</u>		
Total, University	35076	36447	+	3.91

#### COLLEGE ENROLLMENT

The increase or decrease in enrollment as compared to last year by colleges and schools of the University has been as follows:

Urbana - Winter Session		
Agriculture	+	39
Commerce	=	23
Division of Special Services for War Veterans	=	62
Education	+	86
Engineering	+	369
Fine and Applied Arts	No Change	
Institute of Aviation	+	48
Journalism	=	29
Liberal Arts and Sciences	+	387
Physical Education	=	4
Law	+	30
Veterinary Medicine	+	11
Graduate College	+	271
Chicago Professional Colleges - Winter Session		
Medicine	+	15
Medical Illustration	=	1
Occupational Therapy	=	2
Nursing-Regular Program	+	15
Nursing-Affiliation Program	=	24
Nursing-Continuation Program	=	1
Dentistry	+	9
Pharmacy	+	32
Special Courses	=	8
Graduate College (Duplicates registered in other colleges deducted)	+	10
Chicago Undergraduate Division - Winter Session		
Liberal Arts and Sciences	=	241
Commerce	=	100
Division of Special Services for War Veterans	+	5
Engineering	+	102
Physical Education	=	25

---

\*Students who attended more than one branch of the University during the year.

Extramural - Winter Session	+ 361
Summer Session - All Divisions - Net	+ 120
Correction for Duplicates**	- 19
Total Increase - Net	+ 1371

#### REGISTRATION BY CLASSES (UNDERGRADUATE COLLEGES)

Table 5 gives the registration by classes for the winter session in the undergraduate colleges and schools with percentages indicated. The classification is based on each student's most recent registration. In the departments of the University at Urbana, 27.88% of the enrollment was in the freshmen year, 18.76% in the sophomore year, 23.64% in the junior year, and 27.85% in the senior year. Unclassified and irregular students made up the remaining 1.87%.

At the Chicago Undergraduate Division, 57.46% were freshmen, 41.49% were sophomores, and 1.05% were unclassified or irregular.

For the entire University, the non-professional undergraduate percentages were as follows: Freshmen, 34.88%; sophomores, 23.45%; juniors, 18.35%; seniors, 21.62%; unclassified and irregular, 1.70%.

#### ENROLLMENT, MEN AND WOMEN

There have been 26,824 men and 9,623 women enrolled at the University this year. Our enrollment has been therefore, 73.60 per cent men and 26.40 per cent women. The number of men at the University has increased by 644 (or 2.46%) and the number of women has increased by 727 (or 8.17%) in comparison with the enrollment of last year. The percentage of men and women at the various locations is as follows:

	<u>Men%</u>	<u>Women%</u>
Urbana	74.48	25.52
Chicago Professional Colleges	86.52	13.48
Chicago Undergraduate Division	83.75	16.25
Extramural	58.30	41.70

---

\*\*Students who attended more than one branch of the University during the winter session.

## ENROLLMENT, NEW STUDENTS

Exclusive of non-credit extramural courses, 32,953 different students have attended the University during the year. Of these, 21,058 had attended the University previously, and 11,895 were admitted this year for the first time (see Table 6). This is 69 less new students than enrolled a year ago. New students in the summer session at Urbana numbered 615; in the winter session at Urbana, 6751; in the Chicago Professional Colleges summer quarter, 18; and in the winter session, 292. New students in the Chicago Undergraduate Division, summer session, were 170; and winter session, 2715. New students admitted to extramural credit courses in the summer session number 186, and in the winter session, 1148. Of these 11,895 new students, 6,916 (58%) came directly from high school.

## GEOGRAPHICAL DISTRIBUTION

The percentage of students from Illinois at Urbana during the winter session was 86.07 (see Table 7). Last year the percentage was 85.78. For the Chicago Professional Colleges, the percentage of Illinois students was 95.58 as compared with 94.39 last year. At the Chicago Undergraduate Division, 98.08 percent were Illinois residents as compared with 98.45 a year ago.

## UNDERGRADUATE TUITION SCHOLARSHIPS

The number and value of undergraduate tuition scholarships in use for the academic year, 1956-57, and for the summer session 1956, have been as follows: (see Tables 9 and 9a)

<u>Urbana</u>	<u>Number of Scholarships in Use</u>	<u>Money Value</u>
Summer Session, 1956	445	\$ 16,332.50
First Semester, 1956-57	2165	149,107.50
Second Semester, 1956-57	1991	132,512.50
Total (deducting duplicates)	2221	297,952.50
<u>Chicago Professional Colleges</u>		
All Quarters, 1956-57	161	\$ 20,951.16
<u>Chicago Undergraduate Division</u>		
All Sessions, 1956-57	205	\$ 23,530.00

The total money value of tuition scholarships for the year, including the Summer Session of 1956, was, therefore, \$342,433.66. This is \$18,164.25 more than the value of such scholarships for the preceding year.

#### STUDENTS PLACED ON PROBATION OR DROPPED FOR POOR SCHOLARSHIP

Tables 10 and 10a give the number and percentage of students placed on probation or dropped for poor scholarship in February, 1957. This information is given by college, by class, by sex, and by new and former students. It includes all students dropped regardless of whether they were readmitted the second semester. The summary for all the undergraduate colleges at Urbana indicates that 14.45 per cent of the students were placed on probation and 8.60 per cent were dropped. Last year the percentage on probation was 14.99 and the percentage dropped was 7.35. The percentage of men placed on probation was 15.06 and of women, 12.67. The percentage of men dropped was 9.67 and of women, 5.48.

At the Chicago Undergraduate Division, the percentage of students placed on probation was 18.79, while 18.40 per cent were dropped, as compared with last year when 21.02 per cent were placed on probation and 15.50 per cent were dropped.

By colleges at Urbana, the percentage of students placed on probation and dropped, as compared with last year, were as follows:

<u>College</u>	<u>Percentage on Probation</u>		<u>Percentage Dropped</u>	
	<u>Feb. 1956</u>	<u>Feb. 1957</u>	<u>Feb. 1956</u>	<u>Feb. 1957</u>
Agriculture	13.13	13.91	5.79	5.48
Aviation	-	-	10.00	17.00
Commerce	18.52	18.73	7.72	8.43
Education	17.47	18.51	3.58	5.73
Engineering	18.49	17.15	7.93	11.07
Fine and Applied Arts	15.34	14.52	5.93	6.10
Journalism	5.33	5.09	4.44	6.02
Liberal Arts and Sciences	11.81	10.61	7.43	8.09
Physical Education	10.82	10.63	9.57	11.01
Division of Special Services	9.40	9.75	14.18	13.65
Total, Undergraduates	14.99	14.45	7.35	8.60
Law	-	-	2.67	3.96
Veterinary Medicine	5.51	10.07	2.36	3.60

~~no 6~~

MARRIED STUDENTS)  
(See Table 11)

On the Urbana campus for the first semester, out of a total enrollment of 19223 students, 4228 were married. This represents 21.99 per cent of the student body. Last year the percentage was 21.00%. Other percentages of married students were as follows:

	<u>This year</u>	<u>A Year Ago</u>
Freshmen -	4.93%	6.01%
Sophomores -	10.26%	10.51%
Juniors -	17.39%	15.03%
Seniors -	26.14%	24.32%
Graduate Students -	52.75%	52.00%
Veterans -	49.28%	46.85%
Men -	24.66%	23.38%
Women -	13.58%	13.17%

OTHER TABULAR MATERIAL

In addition to the material mentioned in this summary, the following information is given in tabular form in this report:

Table 8 - Comparative Registration by Colleges, First and Second Semesters.

Table 12 - Distribution by Year of Birth.

Table 13 - Graduate Students by Major Subjects.

## OFFICE OF ADMISSIONS AND RECORDS

Annual Report  
June 1, 1957 - May 31, 1958

### INTRODUCTION

The Office of Admissions and Records has conducted general correspondence with prospective students, has passed upon credentials of students entering the colleges and schools, has supervised their entrance examinations, has had charge of matriculation and registration, has assessed tuition and fees, has kept records of all tuition and other fees of students and reported them to the Vice President and Comptroller for collection, has administered the program of undergraduate scholarships, has administered the University Exchange-Visitor Program, has conducted examinations in Illinois for the certificate of Certified Public Accountant, has certified students under Selective Service. The office has been the official depository of all academic records. In a number of graduate and professional programs, it has shared with appropriate committees and/or administrative officers responsibility for the approval of the credentials of entering students.

In September, 1956, the Office of Admissions and Records, in cooperation with colleges and departments on the three campuses, launched an intensive program of school and University relations with primary attention focused on improved articulation. During the past year, responsibility for administering the University's program of College and Career Days was placed in the Office.

### CHANGES IN ADMISSION REQUIREMENTS

The Office of Admissions and Records applied, for the first time in September, 1957, the following changes in general undergraduate entrance requirements:

1. Entering freshmen not residents of Illinois were required to rank in the upper half, rather than the upper three-fourths, of their high school graduating class.
2. Resident transfer students were required to present a 3.0 (C) average unless they had less than 40 semester hours of college work, in which case they could petition for admission if their

average was between 2.5 and 3.0. Previously all resident transfer students with averages below 3.0 were permitted to petition for admission.

3. Entering resident freshmen in the lowest quarter of their high school class were required to participate in a testing and interviewing program before admission. They were not denied the privilege of entering the University if they elected to do so following the testing and interviewing.

#### STUDENTS DENIED ADMISSION

A total of 1232 students were denied admission in September, 1957, to graduate and undergraduate programs at Urbana and to the Chicago Undergraduate Division. The reasons for such denials are indicated on Chart 1, "Admissions Denials by Reason, Urbana and Chicago Undergraduate Division."

A total of 452 students were denied admission in September 1957, to the Chicago Professional Colleges.

#### UNDERGRADUATE SCHOLARSHIP PROGRAM

During the past year 2,717 students held tuition waiver scholarships worth \$391,752.90. (See Table 9A). This represents an increase over the previous year of 130 scholarships with a value of \$49,319.24.

Special cash scholarships with a value of \$192,867.74 were awarded to 676 students. (See Table 9B). The average award was \$270. The previous year 597 students received cash scholarships worth \$148,770, an average of \$250 per scholarship. The average was considerably larger this year because we received, in 1957-58, a number of new scholarships of substantial value.

The new Grants-in-Aid Program made available an additional \$44,450.

Funds for scholarships were made available for the first time in 1957-58 from a number of sources. The following sources provided funds for new scholarships in any field of study: Bertha Compton Memorial Scholarship, Illinois Federation of Labor, Captain James M. Lane (re-established), Meredith and Patricia Mallory Scholarship,

Non-Academic Employees' Children, Mr. and Mrs. Edward North, Peoria Tractor Company, Gretchen Joanna and Paul Schilling, Clara Y. Shaw, Student Senate, United States Rubber Company, Laura Beach Wright, (1958). Funds for scholarships for study in special areas were provided by the following: Chicago Restaurant Association - Agriculture; Southern Illinois Lathing and Plastering - Architecture; Pittsburgh Consolidated Coal Company, Union Carbide and Carbon (expanded program) - Chemical Engineering; Aluminum Company of America, Carrier Corporation, Crane Company, Dow Chemical Company, International Nickel Company, International Telephone and Telegraph Company, Louis Allis Company, Linde Air Products, Owens-Illinois Fiberglass Company, David D. Steinman, Stonefort Corporation, The Texas Company, Alex Van Praag, Jr. Memorial Scholarship, Earl J. Wheeler (to start in 1961), - Engineering; Schlaider Memorial Scholarship - Engineering and Architectural Engineering; The Alfred P. Sloan Foundation Scholarships - Engineering, Science and Commerce; Automobile Manufacturers Association - Industrial Education; Gamma Zeta Scholarship - Journalism.

Also added in 1957-58 was the Grants-in-Aid Program in which awards are based on participation in various campus activities.

It was reported last year that each year we have a rather large number of applicants who have excellent qualifications but who cannot be provided with scholarship assistance because of our limited resources. During 1957-58 a careful analysis of the present situation was made and also a projection was formulated of funds needed to support a scholarship program for the years through 1969 to meet the needs of our anticipated enrollment. This study was presented to The University Study Committee on Future Programs.

An immediate result of this study was approval by the Board of Trustees of additional tuition scholarships as follows: 63 Special County Scholarships to provide additional scholarships in larger counties in proportion to population; 35 University tuition waiver scholarships to be awarded to superior students who

are Illinois residents; 10 tuition waiver scholarships for superior non-state students; and 75 tuition waiver scholarships for superior Illinois high school graduates who will also be assigned part-time University employment which provides from \$400-\$600 for the academic year. These new scholarships will become effective in the fall of 1958 but they were established as a result of the study and recommendations made during the year, 1957-58.

The scholarship program has been discussed with committees and officials of the various colleges, of the Undergraduate Division and the Professional Colleges in Chicago, and with sub-committees in the various colleges. Also, the scholarship program has been presented at several meetings of high school principals, counselors, and teachers.

Various University officials from the Urbana and Chicago Campuses, and the Director of the University of Illinois Foundation met with the University Committee on Undergraduate Scholarships to discuss plans for raising substantial funds to meet the needs of the scholarship program for the growing number of students in the years ahead. It is our hope that the implementation of these plans will bring an adequate response in the form of gifts from firms and corporations and from alumni and other friends of the University.

A new step in the scholarship program was the start this year of the new Illinois State Scholarship authorized by act of the Legislature. On the first of February, 1958, 13,500 high school seniors wrote the first Illinois State Examination on seventy college campuses. Four thousand five hundred students were selected as semi-finalists and 1510 cash awards were made. These students may make their own choice of college. Six hundred have indicated their intent to enter the University of Illinois.

The University County Scholarship examination held in April in each county in the State attracted 2700 applicants this year, an increase of 200 over last year.

A recapitulation of the data presented in Tables 9, 9A, and 9B indicates the following scholarships were awarded in 1957-58:

2717	Tuition-Waiver Scholarships	\$ 391,752.90
676	General and College Scholarships	192,867.74
87	Grants-in-Aid	44,450.00
250	Scholarships-Outside Agencies	89,740.00
4700	Veterans Administration Aid	<u>5,000,000.00</u> (estimated)
	Total	\$5,718,810.64

STEPS TAKEN TO ENCOURAGE SUPERIOR  
STUDENTS TO ATTEND THE UNIVERSITY

The following steps have been taken to encourage superior students to attend the University:

1. Early admission provisions established during the first semester of 1957-58 make it possible for qualified students to obtain permits to enter after seven semesters of high school work. The permits are subject, of course, to graduation from high school and the satisfactory completion of the courses in which the students are registered.
2. Scholarships for students entering the University in September, 1958, for the first time, were in most instances awarded in April, May, and early June rather than in late June, July, and August as in earlier years. The 183 new tuition scholarships approved by the Board of Trustees on April 17, 1958, will encourage additional superior students to attend the University.
3. Part-time employment, which provides from \$400-\$600 for the academic year, and tuition scholarships have been awarded to 75 superior students who must have such assistance to attend the University.
4. Housing contracts are being issued earlier this year than in previous years.

5. Freshman Guidance Examinations, which are required of all new students, and the Mathematics Placement Tests, which are required of students entering certain specific curricula, may now be taken at one of five locations throughout Illinois during the spring and summer months. Heretofore, most of these examinations and tests were taken either at the Chicago Undergraduate Division or at Urbana.
6. Special programs have been initiated in the University for superior students, and others are under consideration.

#### IMPROVED ARTICULATION

The University staff has long been active in many types of school and University activities through all or nearly all of its schools and colleges. During the past year these activities have been intensified, with primary emphasis focused on improved articulation.

Specific steps which have been taken to improve the preparation of students for University work and their orientation in the University, and to otherwise improve articulation between high schools and the University and between colleges and the University follow:

1. Cooperation with the Illinois Association of Secondary School Principals and the Illinois Association of Junior Colleges was strengthened two years ago through the appointment of a Joint Committee of the Illinois Association of Secondary School Principals and the University of Illinois on School and University Relations. The members have been influential in coordinating school and University relations generally, with particular emphasis on improved articulation.
2. Two conferences were held in 1957-58 on the Urbana campus and one at the Chicago Undergraduate Division in which principals, teachers, and counselors from 167 Illinois high schools, University administrators, counselors, and teachers, and University students who were graduates

of the 167 high schools conferred. The specific purposes of the conferences were to enable school and University personnel to cooperate in (a) identifying specific problems which students face in their transition from high school to the University, and (b) formulating definite steps which the University and the high schools should take to help students make the transition from high school to the University.

Primary attention was focused upon improving articulation of English and of counselling. In subsequent conferences, further attention will be given to English and counselling, and, in addition, other subject matter areas will be considered. Mathematics will be considered during the coming year. The articulation of subject matter and of standards of achievement in instruction is extremely important. Moreover, the expansion of testing and counselling programs in high schools and in the University, and their coordination, are vital as we try to help students decide whether they should enter the University or some other post high school educational institution, or perhaps go directly into an occupation. Students exercise excellent self-selection and self-direction with regard to educational and vocational choices when they have sound counselling based on adequate data regarding their aptitudes and needs.

The evidence indicates that conferences are an effective means of reducing the gap between high schools and the University.

3. Potential University students conferred with one or more representatives of the staff of the University in 185 College Day, College Night, and Career Day Programs during the past year. More than 200 high schools participated in these programs; 23 were county-wide. The programs enlisted the cooperation on one or more occasions of 26

University students, 8 alumni, and 122 members of the faculties from our three campuses. Twenty student members of the Freshman Council visited 10 large high schools in teams of 4 to 6 students; members of the senior class accompanied University staff representatives to 6 College Day Programs. In addition, representatives of the University conferred with potential students in 18 meetings sponsored by the University of Illinois Dads Association.

Chart 2 on "Guidance and Articulation" presents the location in Illinois of schools participating in conferences on School-University Articulation, and of College Day, College Night, Career Day, and University of Illinois Dads Association Programs.

4. Cooperation with other colleges and universities in Illinois is being strengthened through work on mutual problems, especially work on improved articulation of curricula and of counselling. In addition, on numerous occasions other colleges have requested the University to provide personnel to make available professional counsel and advice with regard to a number of problems, such as the organization of a new junior college or the expansion of an existing junior college.

#### ENROLLMENT DATA

The following paragraphs provide a summary of enrollment and related facts for the past year. Detailed data enlarging upon this summary are presented in Tables 1 through 14.

#### TOTAL ENROLLMENT (Tables 1, 2, 3, and 4)

The total enrollment for each of the three sessions of the year as compared with the same sessions of the previous year has been as follows:

	<u>Summer Session</u>		<u>First Semester</u>		<u>Second Semester</u>	
	<u>1957</u>	<u>1956</u>	<u>1957-58</u>	<u>1956-57</u>	<u>1957-58</u>	<u>1956-57</u>
Urbana	5608	5411	18813	19223	17627	17704
Chicago Professional Colleges	280	273	1751	1689	1645	1583
Chicago Undergraduate Division	857	921	3679	4135	3115	3449
Extramural Courses	544	503	3074	2585	3371	3024
Agriculture Short Courses	-	-	-	-	81	-
Total	<u>7289</u>	<u>7108</u>	<u>27317</u>	<u>27632</u>	<u>25839</u>	<u>25760</u>

It will be seen that the total enrollment was larger this year than last year in the summer session and in the second semester but was smaller in the first semester. There were 181 more students registered in the summer, 315 less in the first semester, and 79 more in the second semester than for corresponding periods a year ago.

The total enrollment for the year (number of different students who have attended the University during any of its sessions) was 36,261 (see table 4). The similar figure for the preceding year was 36,447. There has been a decrease since last year, therefore, of 186. The totals for all divisions for this year and last last year (including summer session) with percentages of increase or decrease are indicated as follows:

	<u>1957-58</u>	<u>1956-57</u>	<u>Percent of Increase or Decrease</u>	
Urbana	23169	23331	-	.69
Chicago Professional Colleges	1812	1751	+	3.48
Chicago Undergraduate Division	5112	5630	-	9.20
Extramural Courses	6878	6532	+	5.30
Agriculture Short Courses	81	-		
Deduct duplicates*	<u>(791)</u>	<u>(797)</u>		
Total, University	<u>36261</u>	<u>36447</u>	-	<u>.51</u>

\*Students who attended more than one branch of the University during the year.

ENROLLMENT BY COLLEGE  
(Table 4)

The increase or decrease in enrollment as compared to last year by colleges and schools of the University has been as follows:

Urbana - Winter Session

Agriculture	- 96
Aviation	- 16
Commerce	- 279
Division of Special Services for War Veterans	- 83
Education	+ 22
Engineering	- 106
Fine and Applied Arts	- 30
Journalism	- 7

Total Decrease - Net	- 186

## ENROLLMENT BY CLASS, UNDERGRADUATE (Table 5)

Table 5 gives the registration by classes for the winter session in the undergraduate colleges and schools with percentages indicated. The classification is based on each student's most recent registration. In the departments of the University at Urbana, 26.84 percent of the enrollment was in the freshman year, 20.35 percent in the sophomore year, 21.97 percent in the junior year, and 28.95 percent in the senior year. Unclassified and irregular students made up the remaining 1.89 percent.

At the Chicago Undergraduate Division, 58.55 percent were freshmen, 40.43 percent were sophomores, and 1.02 percent were unclassified or irregular.

For the entire University, the non-professional undergraduate percentages were as follows: Freshmen, 33.94 percent; sophomores, 24.29 percent; juniors, 17.29 percent; seniors, 22.77 percent; unclassified and irregular, 1.71 percent.

## ENROLLMENT BY MEN AND WOMEN

There were 26,617 men and 9,644 women enrolled at the University this year. Our enrollment has been, therefore, 73.40 percent men and 26.60 percent women. The

---

\*\*Students who attended more than one branch of the University during the winter session.

number of men at the University has decreased by 207 (or .77 percent) and the number of women has increased by 21 (or .22 percent) in comparison with the enrollment of last year. The percentage of men and women at the various locations is as follows:

	<u>Percent - Men</u>	<u>Percent - Women</u>
Urbana	73.55	26.45
Chicago Professional Colleges	86.87	13.13
Chicago Undergraduate Division	82.06	17.94
Extramural	62.34	37.66
Agriculture Short Courses	96.30	3.70

ENROLLMENT OF NEW STUDENTS  
(Table 6)

Exclusive of non-credit Extramural courses, 32,877 different students have attended the University during the year. Of these 21,414 had attended the University previously, and 11,463 were admitted this year for the first time. This is 432 fewer new students than enrolled a year ago. New students at Urbana numbered 6738; at the Chicago Undergraduate Division, 2638; in Extramural courses, 1662; and in the Agriculture Short Courses, 64. Of these 11,463 new students, 6491 (57 percent) came directly from high school.

ENROLLMENT OF ILLINOIS RESIDENTS  
(Table 7)

The percentage of students from Illinois at Urbana during the winter session was 85.32. Last year the percentage was 86.07. For the Chicago Professional Colleges, the percentage of Illinois students was 96.07 as compared with 95.58 last year. At the Chicago Undergraduate Division, 98.05 percent were Illinois residents as compared with 98.08 a year ago.

ENROLLMENT OF BEGINNING FRESHMEN  
(Table 8)

A total of 3283 students were admitted at Urbana as beginning freshmen directly from secondary schools during the First Semester, 1957-58. This is contrasted with 3629 who were admitted a year ago representing a decrease of 346 or

9.53 percent. At the Chicago Undergraduate Division, 1546 beginning freshmen were admitted as against 1648 a year ago for a decrease of 102 or 6.19 percent. At Urbana, 48.68 percent of the beginning freshmen came from the top quarter of their high school class as compared to 47.15 percent a year ago. Only 5.96 percent came from the lowest quarter as against 6.26 percent a year ago. At the Chicago Undergraduate Division, 32.51 percent of this year's class were top quarter students while a year ago the percentage was only 29.75 percent; 13.76 percent were from the lowest quarter compared to 16.56 percent last year. It would appear from these figures that the 1957 freshman class on both campuses was of a higher quality scholastically, based on the high school record, than the freshman class of the previous year.

MARRIED STUDENTS  
(See Table 12)

On the Urbana campus for the first semester, out of a total enrollment of 18,813 students, 4,251 were married. This represents 22.60 percent of the student body. Last year the percentage was 21.99 percent. Other percentages of married students were as follows:

	<u>Percentage this year</u>	<u>Percentage a year ago</u>
Freshmen -	4.44	4.93
Sophomores -	9.83	10.26
Juniors -	15.40	17.39
Seniors -	29.17	26.14
Graduate -	52.25	52.75
Veterans -	56.67	49.28
Men -	25.88	24.66
Women -	12.84	13.58

# OFFICE OF ADMISSIONS AND RECORDS

Annual Report  
June 1, 1958 - May 31, 1959

## INTRODUCTION

The Office of Admissions and Records has conducted general correspondence with prospective students, has passed upon credentials of students entering the colleges and schools, has supervised their entrance examinations, has had charge of matriculation and registration, has assessed tuition and fees, has kept records of all tuition and other fees of students and reported them to the Vice President and Comptroller for collection, has administered the program of undergraduate scholarships, has administered the University Exchange-Visitor Program, has conducted examinations in Illinois for the certificate of Certified Public Accountant, and has certified students under Selective Service. The office has been the official depository of all academic records. In a number of graduate and professional programs, it has shared with appropriate committees and/or administrative officers responsibility for the approval of the credentials of entering students.

In September, 1956, the Office of Admissions and Records, in cooperation with colleges and departments on the three campuses, launched an intensive program of school and University relations with primary attention focused on improved articulation. In September 1957 and in September 1958, respectively, responsibility for administering the University's programs of College and Career Days and of Veterans Educational Benefits were placed in the Office.

## CHANGES IN ADMISSION AND TRANSFER REQUIREMENTS

The Office of Admissions and Records was authorized for the first time during the school year, 1958-59, to apply the following changes in general undergraduate entrance and transfer requirements:

1. Selected talented secondary school seniors were admitted, for the first time, to regular course work in the 1959 Summer Session of the School of Music.
2. Authorization was given, for the first time, to register selected

talented secondary school seniors in the 1959 Summer Session in certain University courses in Chemistry and in Mathematics. Though the authorization was given, none registered since the anticipated subsidization from sources outside of the University did not materialize.

3. Authorization was given, for the first time, to allow credit and advanced placement in the University to secondary school graduates who had participated successfully in the Advanced Placement Program sponsored by the College Entrance Examination Board.
4. All credit earned on college level General Educational Development Tests was discontinued.
5. Credit provisions for service in the Armed Forces were modified so that the completion of military service, including basic or recruit training of six months or more, is now accepted for the general University requirements of four semester hours of credit in military science and four semester hours of credit in physical education.

#### STUDENTS DENIED ADMISSION

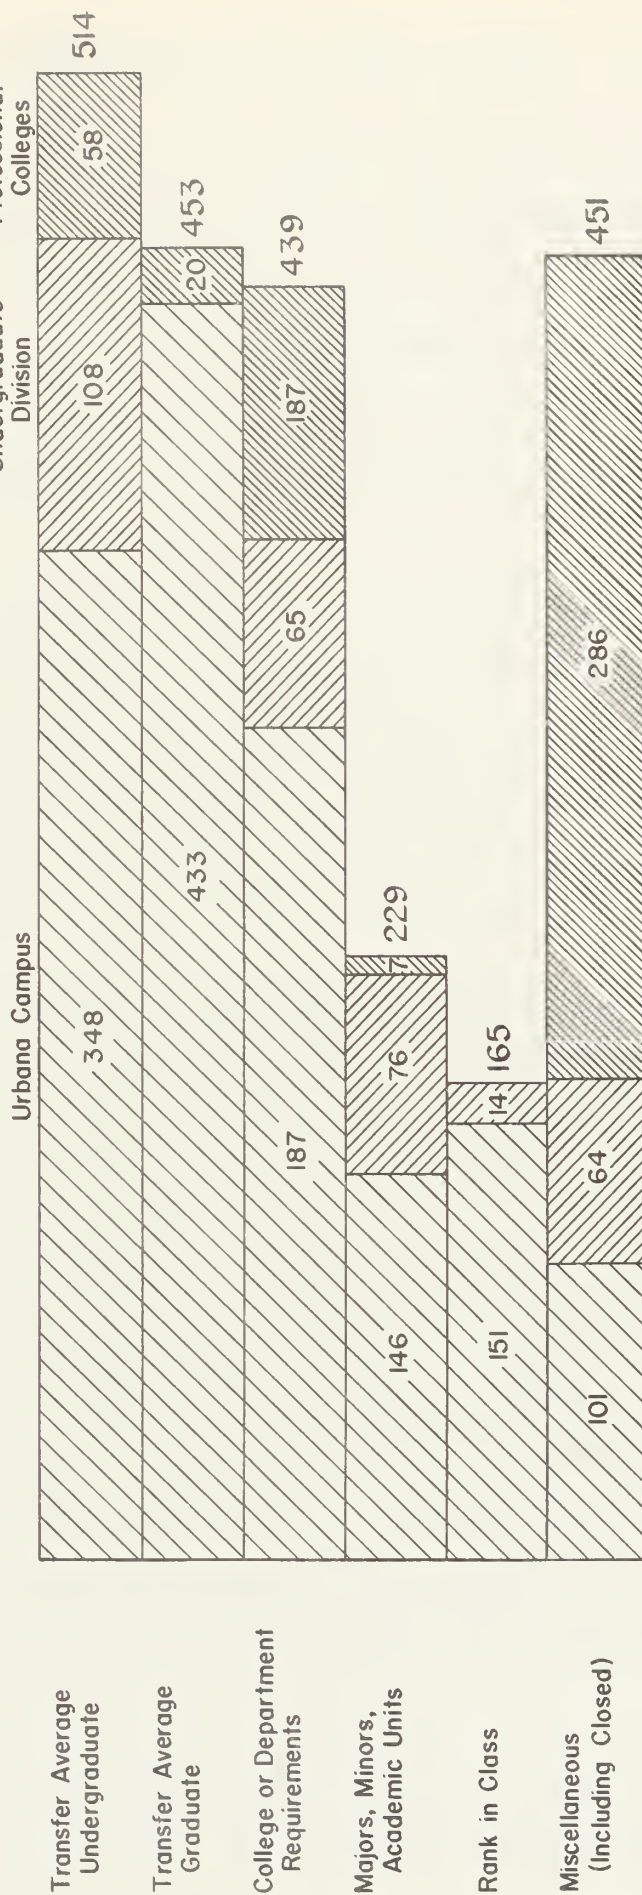

A total of 2251 students were denied admission in September, 1958, to graduate and undergraduate programs at Urbana, to the Chicago Professional Colleges, and to the Chicago Undergraduate Division. The reasons for such denials are indicated on Chart 1, "Admissions Denials by Reason, First Semester, 1958-59, All Campuses."

A total of 11,186 new students were issued permits to enter the University on one of the three campuses of the University; 8,380 of these registered.

## UNDERGRADUATE SCHOLARSHIP PROGRAM

During the past year 3,427 students held tuition waiver scholarships worth \$473,380.25. (See Table 9A). This represents an increase over the previous year of 710 scholarships with a value of \$81,627.35. The principal increase is in Military Scholarships due to the decline in aid under the G.I. Bills. Illinois Veterans not receiving aid from the Veterans Administration apply for the State Military Scholarship which covers tuition.

Special cash scholarships with a value of \$243,048. were awarded to 786 students. (See Table 9B). The average award was \$300. The previous year 676 students received cash scholarships worth \$192,867.74, an average of \$270 per scholarship. The total was considerably larger this year because the University received, in 1958-59, a number of new scholarships of substantial value.

The new Grants-in Aid Program made available an additional \$96,889.

There were 371 students who received scholarship aid from scholarship funds and from money provided by firms and corporations. Candidates for these particular scholarships were not selected by the University. The total number of funds, firms, and corporations supporting this program was 66. The total value of these outside scholarship awards was \$136,559.92. This compares with 250 awards last year with a value of \$89,740. Among the 66 were the following that gave assistance to 10 or more students. The figure after the name indicates the number of students who received aid from this source: Fred S. Bailey 103; George M. Pullman Foundation 73; Evans Scholars Foundation 51; McCourtney Foundation 30; National Merit Scholars 20; William J. Cook 11.

Funds for scholarships were made available for the first time in 1958-59 from a number of sources. The following sources provided funds for

new scholarships in any field of study: Thomas A. Clark, Bertha L. Compton, Non-Academic Employees, Student Senate, Moline Tool Company, and Etta and Laura Beach Wright. Funds for scholarships for study in special areas were provided by the following: Link Foundation - Aircraft Maintenance; Automobile Manufacturers Association - Industrial Education; National Aluminate, Theodore Schlader, Stonefort Mining Corporation, David B. Steinman, and Alex Van Praag - Engineering; George A. Miller - Music; Donald Chamberlain and Grubb-Peterson - Journalism; Archer-Daniels-Midland and Chemstrand Corporation - Chemistry and Chemical Engineering.

The year 1958-59 was the second year for the Grants-in-Aid Program in which awards are based on participation in various campus activities.

In the spring of 1957 the Board of Trustees authorized the awarding of 63 additional County Scholarships each year to high ranking candidates in the larger counties. In addition they authorized 75 Work Scholarships for needy students with superior records. Each of these scholarships is coupled with a job which enables the student to earn a substantial part of his living expenses. The number of University tuition scholarships was increased from 10 to 35, and 10 new tuition scholarships for each entering class were authorized for outstanding non-state students. These additional scholarships have greatly aided the program, and they are reflected in the larger figure of scholarships awarded in 1958-59.

Various University officials from the Urbana and Chicago Campuses and the Director of the University of Illinois Foundation met with the University Committee on Undergraduate Scholarships to discuss plans for raising substantial funds to meet the needs of the scholarship program for the growing number of students in the years ahead. A substantial increase in funds available through the University of Illinois Foundation is the first tangible result of these discussions. The Scholarship Committee hopes that the implementation of plans to increase scholarship funds will bring an

adequate response in the form of gifts from firms and corporations and from alumni and other friends of the University.

The Illinois State Scholarship Program began its operation in 1958, and during the year covered by this report the University had its first group of freshmen under this program. A total of 13,552 high school seniors wrote a state-wide examination and 1,502 were awarded cash scholarships covering tuition and fees (not exceeding \$600) for the institution they chose to attend. In addition, 658 received honorary awards. The following table shows where these scholarship winners elected to attend in 1958-59:

Type of Institution	Mon.	Hon.	Total%	Funds Invested	% of Funds
Private Institutions	924	300	57	\$492,316.00	82.3
Univ. of Ill. (all branches)	379	239	28	76,037.00	12.7
Universities (other than U. of I.)	186	86	13	26,708.00	4.5
Public Junior Colleges	13	33	2	3,099.00	0.5
Total	1502	658		598,160.00	100.0

The University of Illinois in Urbana and Chicago attracted 25.23 percent of the cash award winners and 36.32 percent of the honorary winners, an overall of 28 percent of the successful candidates.

The University County Scholarship examination held in April in each county in the state attracted 2774 applicants this year, an increase of 74 over last year. This examination has been changed to the last Saturday in March by act of the legislature. The change will become effective in 1960.

A recapitulation of the data presented in Tables 9, 9A and 9B indicates that the following scholarships were awarded in 1958-59:

3427	Tuition-Waiver Scholarships	\$ 473,380.25
786	General and College Scholarships	243,048.00
151	Grants-in-Aid	96,889.00
379	Illinois State Scholarships	76,037.00
371	Scholarships-Outside Agencies	136,559.92
3961	Veterans Administration Aid	3,327,663.00
	Total	\$4,353,577.17

## STEPS TAKEN TO ENCOURAGE SUPERIOR STUDENTS TO ATTEND THE UNIVERSITY

The following steps have been taken to encourage superior students to attend the University:

1. Early admission provisions established during the first semester of 1957-58 make it possible for qualified students to obtain permits to enter after seven semesters of high school work. The permits are subject, of course, to graduation from high school and the satisfactory completion of the courses in which the students are registered.
2. Scholarships for students entering the University in September, 1958, for the first time, were in most instances awarded in April, May, and early June rather than in late June, July, and August as in earlier years. The 183 new tuition scholarships approved by the Board of Trustees on April 17, 1958, will encourage additional superior students to attend the University.
3. Part-time employment, which provides from \$400-\$600 for the academic year, and tuition scholarships have been awarded to 75 superior students who must have such assistance to attend the University.
4. Housing contracts are being issued earlier this year than in previous years.
5. A bulletin is in preparation on financial aids available, including scholarships, loans, and work opportunities. It is to be directed, in large part, to superior students. When available, the bulletin will be distributed to high schools and to such persons as the near winners in the National Merit Program, the semifinalists in the General Motors Program, and the prospective James Scholars.
6. Selected talented secondary school seniors will be admitted to the University for the first time in September, 1959. The courses taken will be work over and above the regular secondary school curriculum.

Unusually well qualified secondary school students were admitted for the first time during the 1959 Summer Session to work in the School of Music.

7. Freshman Guidance Examinations, which are required of all new students, and the Mathematics Placement Tests, which are required of students entering certain specific curricula, may now be taken at one of seven locations throughout Illinois during the spring and summer months. Heretofore, most of these examinations and tests were taken either at the Chicago Undergraduate Division or at Urbana.
8. The Edmund J. James Scholars Program will be launched in September, 1959. Other special programs, while limited, were initiated in earlier years for superior students.

#### QUALITY OF NEW FRESHMEN IS IMPROVING

The quality of the student body is improving steadily. The best single index of ability to carry University work is the rank of a student in his high school graduating class.

There has been a steady increase on the Urbana campus in the percentage of beginning freshmen who are from the highest quarter of their high school graduating class--the percent was 46.78 in 1953 and nearly 50 percent in 1958. (See Chart 2). Twenty-eight percent of this top quarter were from the highest 5 percent of their classes. Included in this group are 137 high school valedictorians and 71 salutatorians. Students from the top half of their classes make up almost 80 percent of our new freshmen--an increase of 5 percent in five years. The number from the lowest quarter decreased from over 8 percent in 1953 to less than 6 percent by 1958.

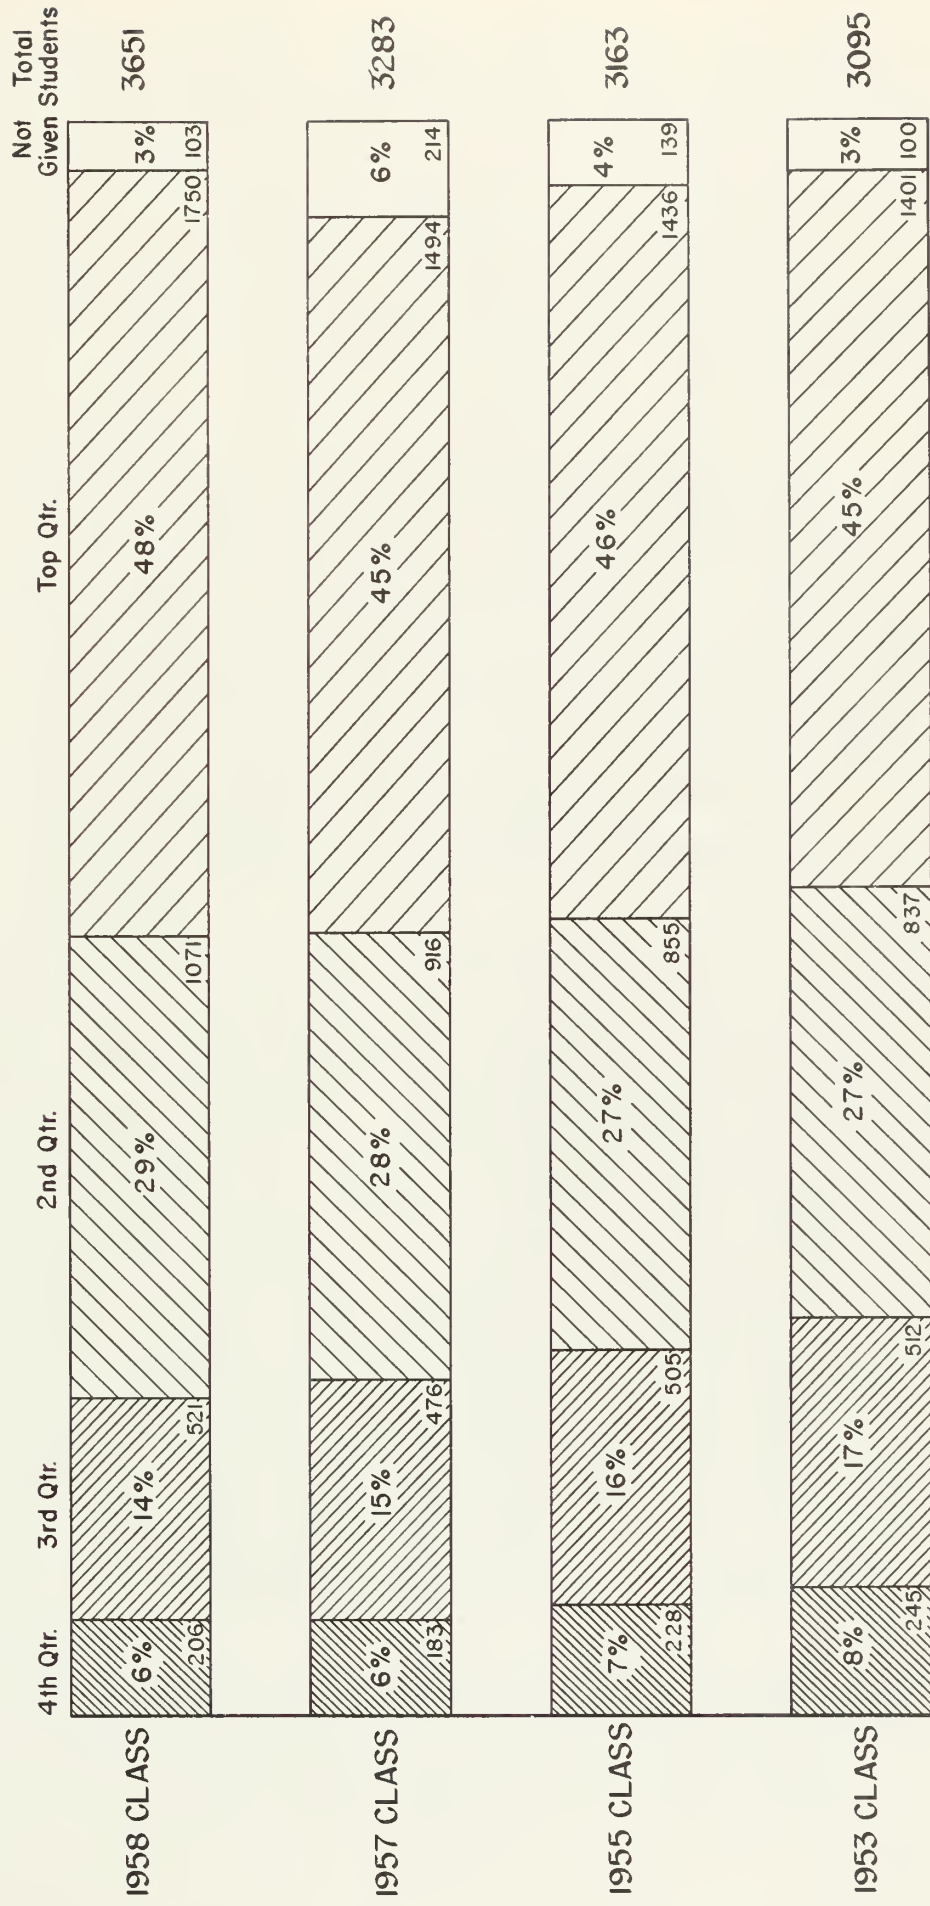

#### IMPROVED ARTICULATION

The University staff has long been active in many types of school and University activities through all or nearly all of its schools and colleges.

CHART 2

University of Illinois  
Office of Admissions and Records  
**RANK IN HIGH SCHOOL CLASS — BEGINNING FRESHMEN**  
URBANA CAMPUS

February 24, 1959

During the past three years these activities have been intensified, with primary emphasis focused on improved articulation.

Specific steps which have been taken to improve the preparation of students for University work and their orientation in the University, and to otherwise improve articulation between high schools and the University and between colleges and the University follow:

1. Cooperation with the Illinois Association of Secondary School principals and the Illinois Association of Junior Colleges was strengthened three years ago through the appointment of a Joint Committee of the Illinois Association of Secondary School Principals and the University of Illinois on School and University Relations. The members have been influential in coordinating school and University relations generally, with particular emphasis on improved articulation.
2. Two conferences were held in 1958-59 on the Urbana campus and one at the Chicago Undergraduate Division in which principals, teachers, and counselors from 173 Illinois high schools, University administrators, counselors, and teachers, and University students who were graduates of the 173 high schools conferred. The specific purposes of the conferences were to enable school and University personnel to cooperate in (a) identifying specific problems which students face in their transition from high school to the University, and (b) formulating definite steps which the University and the high schools should take to help students make the transition from high school to the University.

Primary attention was focused upon improving articulation of English, of mathematics, and of counselling. In subsequent

conferences, further attention will be given to English, mathematics, and counselling, and, in addition, other subject matter areas will be considered. The articulation of subject matter and of standards of achievement in instruction is extremely important. Moreover, the expansion of testing and counselling programs in high schools and in the University, and their coordination, are vital as we try to help students decide whether they should enter the University or some other post high school educational institution, or perhaps go directly into an occupation. Students exercise excellent self-selection and self-direction with regard to educational and vocational choices when they have sound counselling based on adequate data regarding their aptitudes and needs.

The evidence indicates that conferences are an effective means of reducing the gap between high schools and the University.

3. Potential University students conferred with one or more representatives of the staff of the University in 193 College Day, College Night, and Career Day Programs during the past year. Three hundred and fifty-eight schools participated in these programs; 35 of the programs were county-wide. The programs enlisted the cooperation on one or more occasions of 28 University students and 192 members of the faculties from our three campuses. In addition, representatives of the University conferred with potential students in 19 meetings sponsored by the University of Illinois Dads Association.

Chart 3 on "Guidance and Articulation, 1958-59," presents the location in Illinois of schools participating in conferences on School-University Articulation, of College Day, College Night, Career Day, and University of Illinois Dads Association Programs,

and of schools in which the film on "Student Life at the University of Illinois" was shown.

4. The film on "Student Life at the University of Illinois" was presented in 220 high schools. In 55 of these schools representatives of the University presented the film in connection with College Day Programs; in 162 the film was shown apart from a College Day and without a representative of the University in attendance.
5. Cooperation with other colleges and universities in Illinois is being strengthened through work on mutual problems, especially work on improved articulation of curricula and of counselling. In addition, on numerous occasions other colleges have requested the University to provide personnel to make available professional counsel and advice with regard to a number of problems, such as the organization of a new junior college or the expansion of an existing junior college.

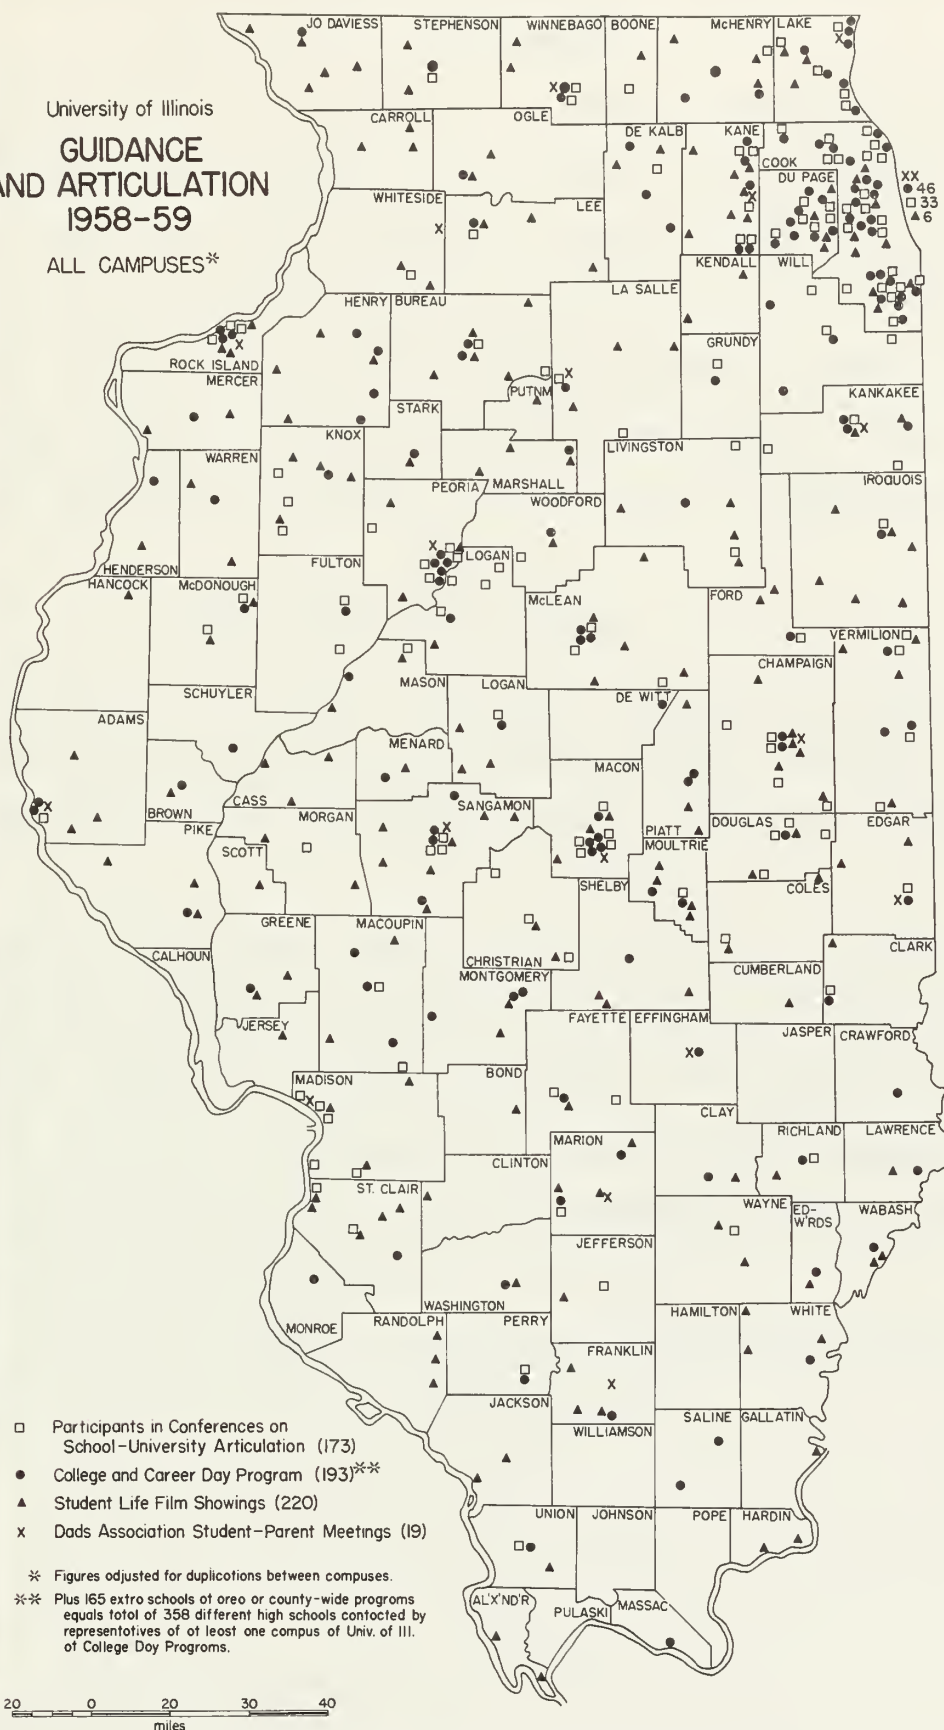

#### SUMMER ORIENTATION PROGRAM FOR NEW STUDENTS

A pilot program of orientation, program counselling, and advance registration was initiated in June, 1959, for a representative group of new freshmen. The program was designed to serve students more adequately than heretofore and to prevent some of the errors in judgment that occasionally occur during the rush of program counselling and registration in the Fall. If the program is judged to be successful, it will be expanded gradually to include the maximum possible number of new students.

 AND ARTICULATION  
 1958-59**

ALL CAMPUSES\*

#### DISTRIBUTION OF GRADE REPORTS

During the past year grade reports were sent to freshmen, to their parents, and to high school principals of schools from which the students were graduated. One class will be added each year for the next three years so that at the end of three years all undergraduate students will be receiving such reports.

Prior to 1952 the University sent freshmen academic records to the principals of high schools from which the students were graduated. This practice was discontinued following the school year 1951-52 because of budgetary curtailments.

#### VETERANS EDUCATIONAL BENEFITS

The personnel and functions of the Veterans Educational Benefits Office were transferred in September, 1958, from the Division of Special Services for War Veterans to the Scholarship Division of the Office of Admissions and Records.

The staff of the Veterans Educational Benefits Office continues to process all benefits for veterans attending the University under Public Laws 550, 634, and 894. This load is gradually decreasing. As it decreases, the staff is assuming increasing responsibility for selected normal functions of the Scholarship Division such as State Military Scholarships, the Work-Scholarship Program, and the Grants-In-Aid Program.

Data concerning the number of students who received veterans educational benefits during the past year follow: (on next page 14a).

# ENROLLMENT DATA

The following paragraphs provide a summary of enrollment and related facts for the past year. Detailed data enlarging upon this summary are presented in Tables 1 through 12.

## TOTAL ENROLLMENT (Tables 1, 2, 3, and 4)

The total enrollment for each of the three sessions of the year as compared with the same session of the previous year has been as follows:

	Summer Session		First Semester		Second Semester	
	<u>1958</u>	<u>1957</u>	<u>1958-59</u>	<u>1957-58</u>	<u>1958-59</u>	<u>1957-58</u>
Urbana	6272	5608	19476	18813	17863	17627
Chicago Professional Colleges	326	280	1997	1751	1884	1645
Chicago Undergraduate Division	1176	857	3852	3679	3269	3115
Extramural Courses	645	544	3678	3074	3782	3371
Agriculture Short Courses	<u>-</u>	<u>-</u>	<u>-</u>	<u>-</u>	<u>76</u>	<u>81</u>
Total	8419	7289	29003	27317	26874	25839

It will be seen that the total enrollment was larger this year than last year in all sessions. There were 1130 more students registered in the summer, 1686 more in the first semester, and 1035 more in the second semester than for corresponding periods a year ago. Included in the first and second semester increases are 179 Interns and Residents at the Chicago Professional Colleges. Data for this group was not available in previous years.

The total enrollment for the year (number of different students who have attended the University during any of its sessions) was 38,251 (see table 4). The similar figure for the preceding year was 36,261. There has been an increase since last year, therefore, of 1990. The totals for all campuses and Extramural courses for this year and last year (including summer sessions) with percentages of increase or decrease are indicated as follows:

	<u>1958-59</u>	<u>1957-58</u>	<u>Percent of Increase or Decrease</u>	
Urbana	23911	23169	+	3.20
Chicago Professional Colleges	2074	1812	+	14.46
Chicago Undergraduate Division	5583	5112	+	9.21

Total Increase - Net	+ 1990

\*Students who attended more than one branch of the University during the winter session.

### ENROLLMENT BY MEN AND WOMEN

There were 27,836 men and 10,415 women enrolled at the University this year. Our enrollment has been, therefore, 72.77 percent men and 27.23 percent women. The number of men at the University has increased by 1219 (or 4.58 percent), and the number of women has increased by 771 (or 7.99 percent) in comparison with the enrollment of last year. The percentages of men and women at the various locations are as follows:

	<u>Men</u>	<u>Women</u>
Urbana	72.75	27.25
Chicago Professional Colleges	86.74	13.26
Chicago Undergraduate Division	79.29	20.71
Extramural	63.41	36.59
Agriculture Short Courses	98.68	1.32

### ENROLLMENT BY CLASS, UNDERGRADUATE (Table 5)

Table 5 gives the registration by classes for the winter session in the undergraduate colleges and schools with percentages indicated. The classification is based on each student's most recent registration. In the departments of the University at Urbana, 28.87 percent of the enrollment was in the freshman year, 18.88 percent in the sophomore year, 22.77 percent in the junior year, and 27.77 percent in the senior year. Unclassified and irregular students made up the remaining 1.71 percent.

At the Chicago Undergraduate Division, 63.17 percent were freshmen, 35.80 percent were sophomores, and 1.03 percent were unclassified or irregular.

For the entire University, the percentages of non-professional undergraduate students were as follows: Freshmen, 36.81 percent; sophomores, 22.16 percent; juniors, 17.76 percent; seniors 21.70 percent; unclassified and irregular, 1.57 percent.

ENROLLMENT OF NEW STUDENTS  
(Table 6)

Exclusive of non-credit Extramural courses, 34,718 different students have attended the University during the year. Of these 21,610 had attended the University previously, and 13,108 were admitted this year for the first time. This is 1645 more new students than enrolled a year ago. New students at Urbana numbered 7481; at the Chicago Professional Colleges, 420; at the Chicago Undergraduate Division, 3043; in Extramural courses, 2107; and in the Agriculture Short Courses, 57. Of these 13,108 new students, 7195 (55 percent) came directly from high school.

ENROLLMENT OF RESIDENT  
AND NON-RESIDENT STUDENTS  
(Table 7 and Charts)

Among the 27,457 students registered on the three major campuses and in credit Extramural courses during the First Semester, 23,896 (87.03%) list a home address in the State of Illinois; a year ago the percentage was 88.07. Every county is represented. Another 2564 come from the 48 states plus the District of Columbia. There are 74 students from United States territories or possessions (Hawaii, Puerto Rico, and Virgin Islands) and 923 students from 71 different foreign countries.

ENROLLMENT OF BEGINNING FRESHMEN  
(Table 8)

A total of 3651 students were admitted at Urbana as beginning freshmen directly from secondary schools during the First Semester, 1958-59. This is contrasted with 3283 who were admitted a year ago representing an increase of 368 or 11.21 percent. At the Chicago Undergraduate Division, 1797 beginning freshmen were admitted as against 1546 a year ago for an increase of 251 or 16.24 percent. At Urbana, 49.32 percent of the beginning freshmen came from the top quarter of their high school classes as compared to 46.68 percent a year ago. Only 5.81 percent came from the lowest quarter as against 5.96 percent a year ago. At the Chicago Undergraduate Division, 31.91 percent of this years class were top quarter students while a year ago the percentage was 32.51 percent; 11.72 percent were from the lowest quarter compared to 13.76 percent last year. It would appear from these figures that the 1958 freshman class on both

campuses was of a higher quality scholastically, based on the high school record, than the freshman class of the previous year.

MARRIED STUDENTS  
(See Table 10)

On the Urbana campus for the first semester, out of a total enrollment of 19,476 students, 4,453 were married. This represents 22.86 percent of the student body. Last year the percentage was 22.60 percent. Other percentages of married students were as follows:

	<u>First Semester 1958-59</u>	<u>First Semester 1957-58</u>
Freshmen -	3.15	4.44
Sophomores -	8.77	9.83
Juniors -	15.85	15.40
Seniors -	29.59	29.17
Graduate -	53.43	52.25
Veterans -	61.35	56.67
Men -	26.01	25.88
Women -	13.73	12.84

## OFFICE OF ADMISSIONS AND RECORDS

Annual Report  
June 1, 1959 - May 31, 1960

## INTRODUCTION

The Office of Admissions and Records has conducted general correspondence with prospective students, has passed upon credentials of students entering the colleges and schools, has supervised their entrance examinations, has had charge of matriculation and registration, has assessed tuition and fees, has kept records of all tuition and fees of students and reported them to the Vice President and Comptroller for collection, has administered the program of undergraduate scholarships, has administered the University Exchange-Visitor Program, has conducted examinations in Illinois for the certificate of Certified Public Accountant, has certified students under Selective Service, and has conducted research on student status and progress. The Office has been the official depository of all academic records. In a number of graduate and professional programs, it has shared with appropriate committees and/or administrative officers responsibility for the approval of the credentials of entering students.

In September, 1956, the Office of Admissions and Records, in cooperation with colleges and departments on the three campuses, launched an intensive program of school and University relations with primary attention focused on improved articulation. In 1958-59, this program was extended to include college-University relations; in 1959-60, the phase related to junior college-University relations was accelerated considerably. In September 1957 and in September 1958, respectively, responsibility for administering the University's programs of College and Career Days and of Veterans Educational Benefits were placed in the Office.

## CHANGES IN ADMISSION AND TRANSFER REQUIREMENTS

The following changes in general undergraduate entrance and transfer requirements were approved:

1. The plan of admission of selected talented secondary school seniors, initiated in the 1959 Summer Session, was extended to permit such students to enroll in extension classes, effective September 1, 1960.
2. Regulations governing the admission of Illinois residents who ranked in the lowest quarter of their high school classes were modified, effective September 1, 1960, to discontinue compulsory interviews following the required tests.
3. The regulations pertaining to lowest quarter Illinois students were further modified, effective September 1, 1961, to require such students to demonstrate through examinations

their readiness for University work or to defer for one year their admission. The same requirement will be applied to students who are in the lower half of their classes, effective September 1, 1963.

4. Requirements for the admission of transfer students were modified, effective September 1, 1960, to delete the 3.0 combined average for the last two semesters, and to add an interpretation that "the last semester average" must include a minimum of 12 semester hours.
5. A program of progressive admissions was approved, effective September 1, 1961, based upon the principle that the best qualified students, those who are most likely to succeed and graduate, should be given top priority in admission.

The following changes in college admission requirements were approved:

1. The requirements for admission to the College of Engineering were modified to include, in addition to present requirements, effective September 1, 1963, (1.1) two units in the social studies, (1.2) two units in one foreign language, (1.3) two units in science, and (1.4) a total of  $12\frac{1}{2}$  academic units, rather than the present nine.
2. The foreign language requirements for admission to the College of Liberal Arts and Sciences and to the Art and Music curricula in the College of Fine and Applied Arts were modified, effective September 1, 1964, (2.1) to stipulate that the two units of high school language may no longer be waived for students who are in the upper half of their high school classes, and (2.2) to specify that the two units may be in any language in which the University offers instruction, thereby adding Portuguese and Russian to the approved list.
3. The basic knowledge requirements for admission to the College of Liberal Arts and Sciences were modified, effective September 1, 1961, (3.1) to make it unnecessary for students entering the general curriculum who lack one unit in American History in high school to take History 151 and 152, and (3.2) to stipulate that one unit of high

school algebra and one unit of high school plane geometry, or their equivalents, are non-waiver requirements for admission.

#### STUDENTS DENIED ADMISSION

A total of 2,292 students were denied admission in September, 1959, to graduate and undergraduate programs at Urbana, to the Chicago Professional Colleges, and to the Chicago Undergraduate Division. The reasons for such denials are indicated on Chart 1, "Admissions Denials by Reason, First Semester, 1959-60, All Campuses."

A total of 12,179 new applicants were issued permits to enter the University on the three campuses; 8,969 of these registered.

#### UNDERGRADUATE SCHOLARSHIP PROGRAM

During the past year 3,861 students held tuition-waiver scholarships worth \$541,707. (See Table 9A). This represents an increase over the previous year of 434 scholarships with a value of \$68,327. The principal increase was in Military Scholarships due to the decline in aid under the G.I. Bills. Illinois Veterans not receiving aid from the Veterans Administration apply for the State Military Scholarship which covers tuition.

Special cash scholarships with a value of \$224,998 were awarded to 885 students. (See Table 9B). The average award was \$255. The previous year 786 students received cash scholarships worth \$222,243 (adjusted total), an average of \$280 per scholarship. Scholarship funds were received from 134 sources this year as compared to 137 last year.

The Grants-in-Aid Program made available an additional \$141,367.30.

There were 422 students who received scholarship aid from scholarship funds and from money provided by firms and corporations. Candidates for these particular scholarships were not selected by the University. The total number of funds, firms, and corporations supporting this program was 77. The total value of these outside scholarship awards was \$150,479.05. (See Table 9C). This compares with 371 awards last year with a value of \$136,559.92. Among the 77 were the following that gave assistance to 10 or more students. The figure after the name indicates the number of students who received aid from this source: Fred S. Bailey 103; George M. Pullman Foundation 65; Evans Scholars Foundation 65; McCourtney Foundation 40; National Merit Scholars 23; William J. Cook 13.

Funds for scholarships were made available for the first time in 1959-60 from a number of sources. The following sources provided funds for new scholarships in any field of study: Men's Residence Halls - Calvin Sifferd Fund, G. J. and P. C. Schilling, Frank Stewart, and Tee-Pak Foundation. Funds for scholarships for study in special areas were provided by the following:

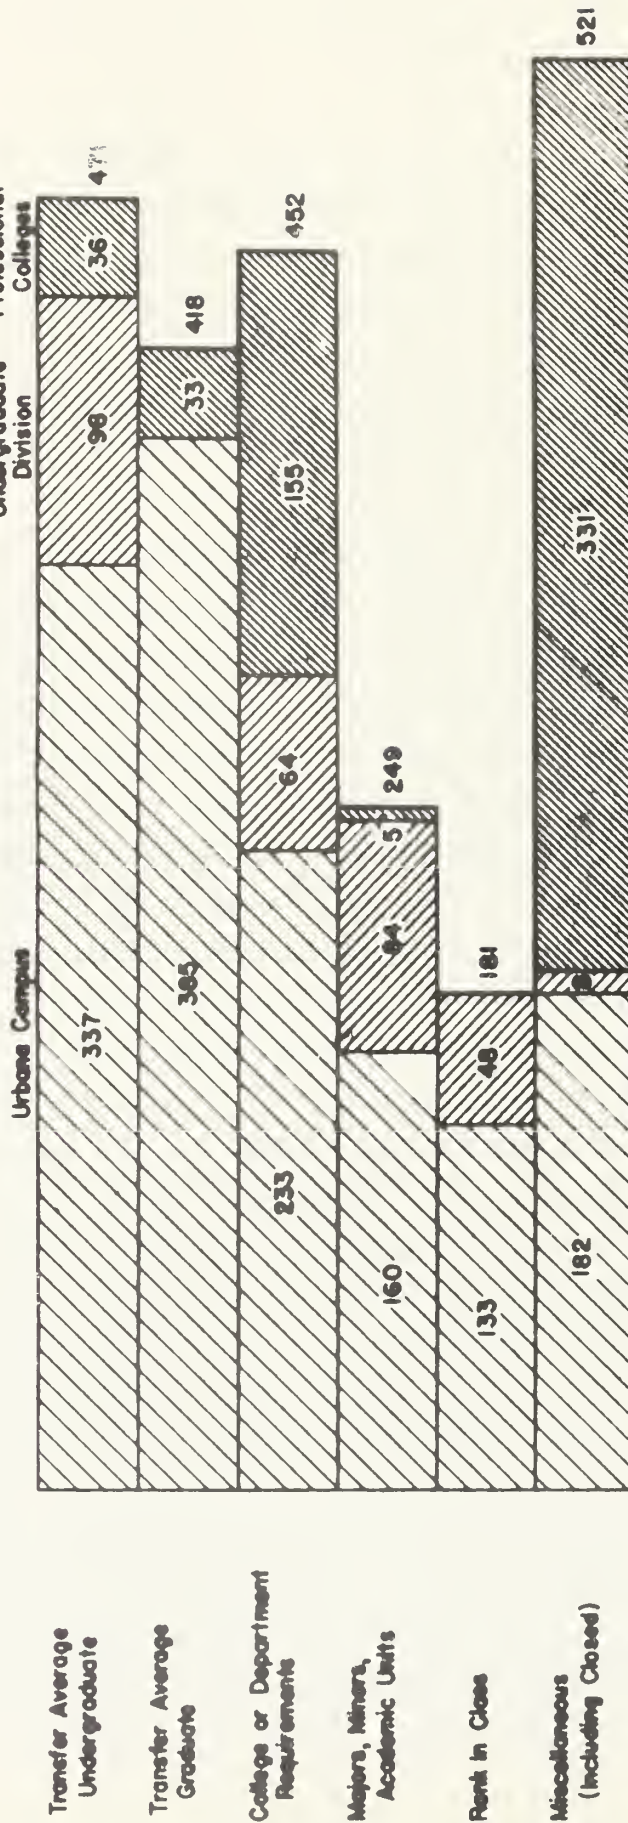

Chart 1

Office of Admissions and Records

# ADMISSIONS DENIALS BY REASON

First Semester, 1959-60

ALL CAMPUSES

Total Denied Admission - 2292

Total Accepted - 12,178

Total New Registrations - 8969

February 15, 1960

George Doak Memorial--Agriculture; Illini Club of Banking--Commerce; Aerojet-General Corporation--Ceramic Engineering; Harry M. Gunther, and Leigh F. J. Zerbee--Engineering; Woman's Architectural League--Architecture; California Oil Company--Geology; and Consolidation Coal Company--Chemical Engineering.

The year 1959-60 was the third year for the Grants-in-Aid Program in which awards are based on participation in various campus activities. From the \$141,367.30 received, 24 athletic awards were made, totalling \$4,600, from the Illini Achievement contributions, 158 athletic awards were made, totalling \$135,577.30, through the Big-Ten Grant-in-Aid Program, and nine non-athletic awards were made, totalling \$1,190.

In the spring of 1957 the Board of Trustees authorized the awarding of 63 additional County Scholarships each year to high ranking candidates in the larger counties. In addition they authorized 75 Work Scholarships for needy students with superior records. Each of these scholarships is coupled with a job which enables the student to earn a substantial part of his living expenses. The number of University tuition scholarships was increased from 10 to 35, and 10 new tuition scholarships for each entering class were authorized for outstanding non-state students. These additional scholarships have greatly aided the program, and they are reflected in the larger figure of scholarships awarded in 1958-59.

The shortage of undergraduate scholarship funds continues to be a matter of genuine concern to the Committee. A number of steps have been taken to provide a limited number of additional scholarships, but the growth in funds does not keep pace with the growth in demand for aid. The number of students who must be denied scholarship aid is distressingly large. The University of Illinois Foundation has increased the funds available from two large funds--the Clara Y. Shaw and the Foundation Scholarship Funds--from \$15,000 in 1959-60 to \$25,000 in 1960-61. This was a great help. On the other hand, we had two substantial losses: The Harry G. and Harriett A. Wright Scholarship income dropped from \$15,000 to \$7,500 and the Jeanette E. and Benjamin F. Hunter Scholarship income dropped from \$9,000 to \$5,400. The combined loss in these two funds, due to a decline in farm income, is a total of \$11,000, \$1,000 more than the increase in Foundation funds.

The Board of Trustees established 75 tuition-waiver scholarships each year, effective in September, 1960, for junior college transfers. These are two-year scholarships to cover tuition in the junior and senior years.

In addition, the Trustees increased the number of County Scholarships by 34 beginning in 1960, to provide additional scholarships in the larger counties. This adjustment was based on the new 1960 census figures and provides one scholarship for each 50,000 population or fraction thereof.

The Illinois State Scholarship Program began its operation in 1958. We now have had two years under this program. About 1,500 students each year are awarded cash scholarships covering tuition and fees (not exceeding \$600) for the institution they choose to attend. In addition there are 600 to 700 who receive honorary awards. We had 506 students in 1959-60 (new awards and renewals) whose fees were paid by the Illinois Scholarship Commission. The total value of these scholarships was \$98,400. In 1958-59 we had our first group (all freshmen). There were 379 students whose fees totaled \$76,037. These numbers will increase each year until we have state scholarship holders in each of the four classes.

The University County Scholarship examination held in March in each county in the state attracted 3,712 applicants this year, an increase of almost 1,000 over last year.

A recapitulation of the data presented in Tables 9, 9A, 9B, 9C, 9D, and 9E indicates that the following scholarships were awarded in 1958-59:

3861	Tuition-Waiver Scholarships	\$ 541,707.00
885	General and College Scholarships	224,998.00
191	Grants-in-Aid	141,367.30
506	Illinois State Scholarships	98,400.00
422	Scholarships-Outside Agencies	150,479.00
2639	Veterans Administration Aid	2,149,353.00
<hr/>		<hr/>
8504	Total	\$3,306,304.30

#### STEPS TAKEN TO ENCOURAGE SUPERIOR STUDENTS TO ATTEND THE UNIVERSITY

The following steps have been taken to encourage superior students to attend the University:

1. The many excellent opportunities available at the University have been stressed in the accelerated program of School-University relations. While many of these opportunities may be enjoyed by all students, a number of them are designed for superior students.
2. The Edmund J. James Scholars Program was launched in September, 1959. Other special programs, while limited, were initiated in earlier years for superior students.
3. Selected talented secondary school seniors were admitted to the University for the first time in September, 1959. The

courses taken represented work which was over and above the regular secondary school curriculum. They will be admitted for the first time in September, 1960, to extension classes.

Unusually well qualified secondary school students were admitted for the first time during the 1959 Summer Session to work in the School of Music.

4. A bulletin is in press on financial aids available, including scholarships, loans, and work opportunities. It is directed, in large part, to superior students. The bulletin will be distributed to high schools and to such persons as the near winners in the National Merit Program, the semifinalists in the General Motors Program, and the prospective James Scholars.
5. Examinations required of all new students were administered, in cooperation for the first time with other state-supported institutions of higher learning in Illinois, in 27 separate testing sessions at 19 different locations throughout Illinois during the spring and summer months. Heretofore, most of these examinations and tests were taken either at the Chicago Undergraduate Division or at Urbana. The cooperative arrangement with the other state-supported institutions of higher learning for administering the examinations decreases travel distances required of students.
6. Scholarships for students entering the University in September, 1958, for the first time, were in most instances awarded in April, May, and early June rather than in late June, July, and August as in earlier years. The 34 new tuition-waiver county scholarships and the 75 new tuition-waiver junior college scholarships approved by the Board of Trustees during the past year will encourage additional superior students to attend the University.
7. Part-time employment, which provides from \$400-\$600 for the academic year, and tuition scholarships have been awarded to 75 superior students who must have such assistance to attend the University.
8. Early admission provisions established during the first semester of 1957-58 have been continued. They make it

possible for qualified students to obtain permits to enter after seven semesters of high school work. The permits are subject, of course, to graduation from high school and the satisfactory completion of the courses in which the students are registered.

#### QUALITY OF NEW FRESHMEN IS IMPROVING

The quality of the student body is improving steadily. The best single index of ability to carry University work is the rank of a student in his high school graduating class.

There has been a steady increase on the Urbana campus in the percentage of beginning freshmen who are from the highest quarter of their high school graduating class--the percent was 46.78 in 1953 and 50.66 percent in 1959. (See Chart 2). Students from the top half of their classes make up almost 80 percent of our new freshmen--an increase of 5 percent in six years. The number from the lowest quarter decreased from over 8 percent in 1953 to less than 5 percent by 1959.

#### IMPROVED ARTICULATION

The University staff has long been active in many types of school and University activities through all or nearly all of its schools and colleges. During the past four years these activities have been intensified, with primary emphasis focused on improved articulation.

Specific steps which have been taken to improve the preparation of students for University work and their orientation in the University, and to otherwise improve articulation between high schools and the University and between colleges and the University follow:

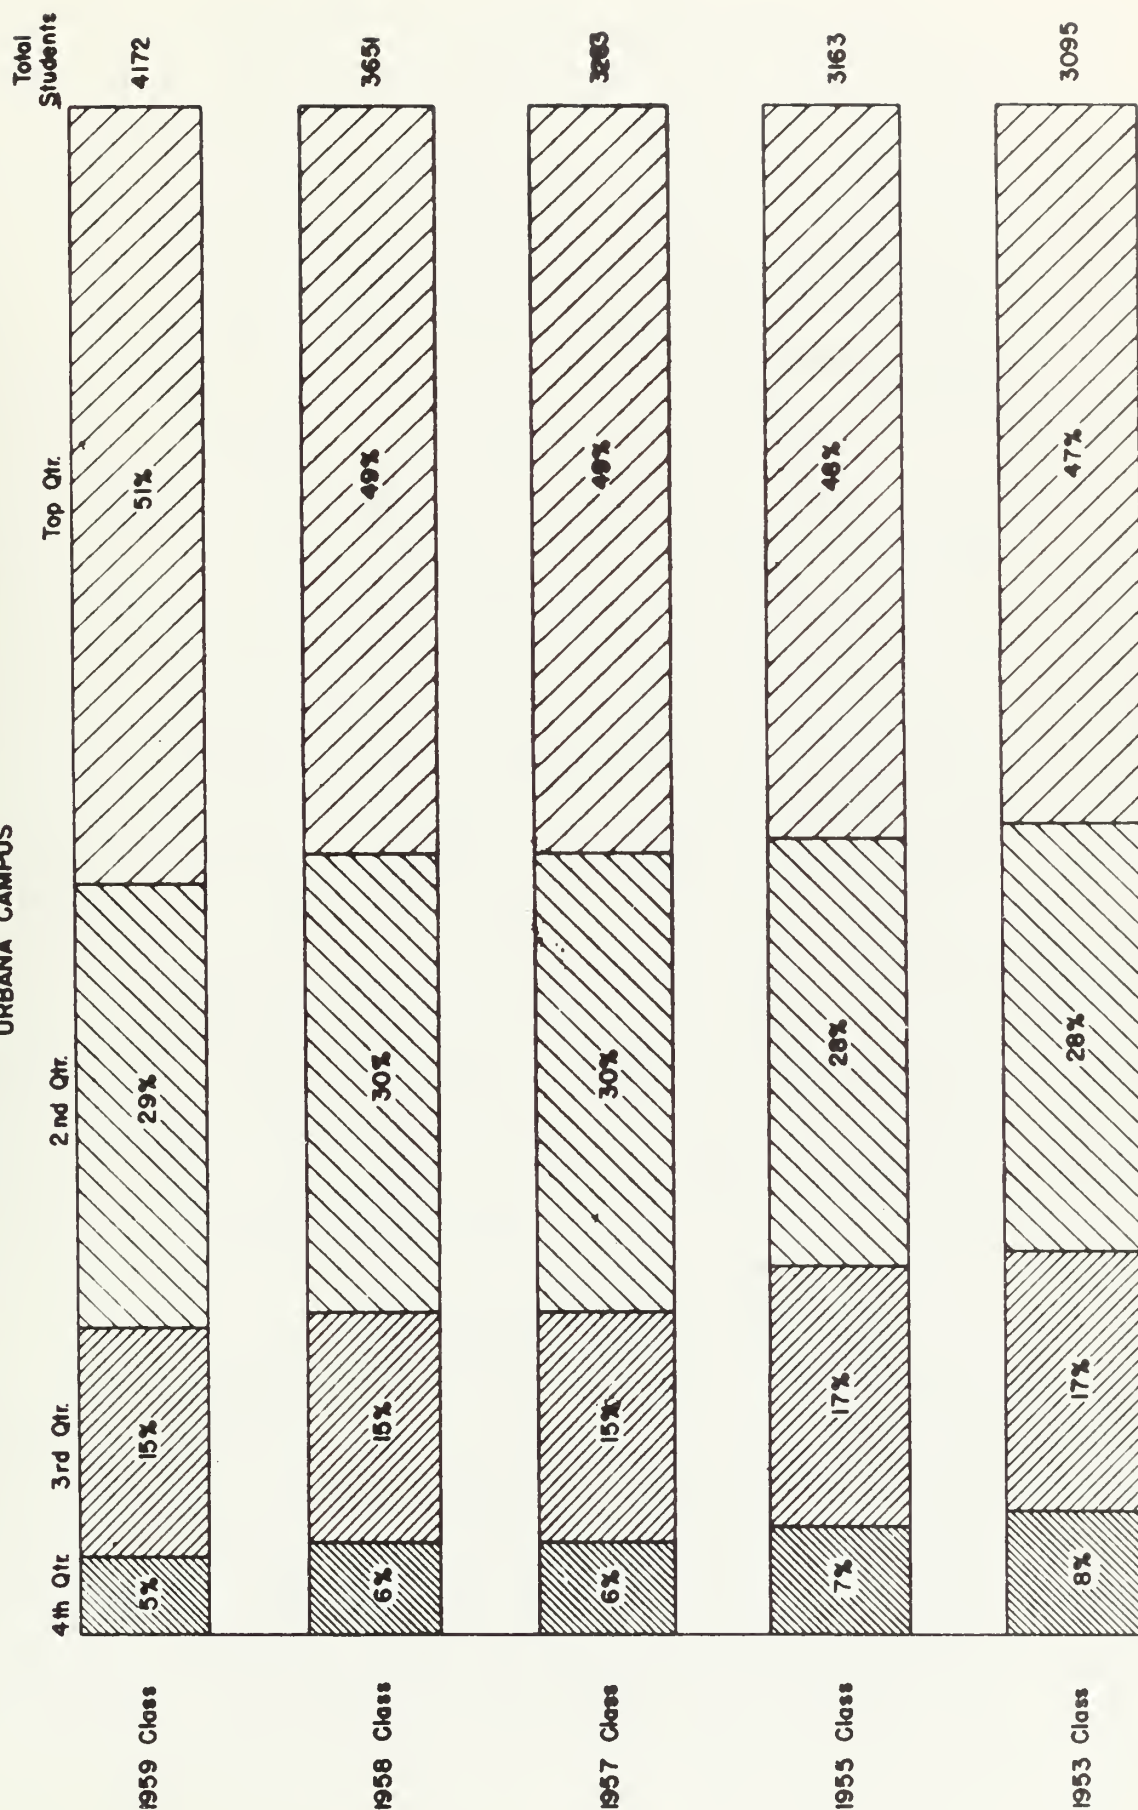

1. Cooperation with the Illinois Association of Secondary School Principals and the Illinois Association of Junior Colleges was strengthened four years ago through the appointment of a Joint Committee of the Illinois Association of Secondary School Principals and the University of Illinois on School and University Relations. The members have been influential in coordinating school and University relations generally, with particular emphasis on improved articulation.
2. Two conferences were held in 1959-60 on the Urbana campus and one at the Chicago Undergraduate Division in which principals, teachers, and counselors from 178 Illinois high

Chart 2

University of Illinois  
Office of Admissions and Records

# RANK IN HIGH SCHOOL CLASS - BEGINNING FRESHMEN

URBANA CAMPUS

February 15, 1960

schools, University administrators, counselors, and teachers, and University students who were graduates of the 178 high schools conferred. The specific purposes of the conferences were to enable school and University personnel to cooperate in (a) identifying specific problems which students face in their transition from high school to the University, and (b) formulating definite steps which the University and the high schools should take to help students make the transition from high school to the University.

Primary attention was focused upon improving articulation of English, of mathematics, and of counselling at Urbana, and of geography, of history, of mathematics, and of counselling at the Chicago Undergraduate Division. In subsequent conferences, further attention will be given to the areas cited, and, in addition, the social sciences will be considered at Urbana. The articulation of subject matter and of standards of achievement in instruction is extremely important. Moreover, the expansion of testing and counselling programs in high schools and in the University, and their coordination, are vital as we try to help students decide whether they should enter the University or some other post high school educational institution, or perhaps go directly into an occupation. Students exercise excellent self-selection and self-direction with regard to educational and vocational choices when they have sound counselling based on adequate data regarding their aptitudes and needs.

The evidence indicates that conferences are an effective means of reducing the gap between high schools and the University.

3. Potential University students conferred with one or more representatives of the staff of the University in 287 College Day, College Night, and Career Day Programs during the past year. Four hundred and seven schools participated in these programs. The programs enlisted the cooperation on one or more occasions of 142 members of the faculties from

our three campuses. In addition, representatives of the University conferred with potential students in 19 meetings sponsored by the University of Illinois Dads Association.

4. The film on "Student Life at the University of Illinois" was presented in 193 high schools in Illinois. In 71 of these schools representatives of the University presented the film in connection with College Day Programs; in 122 the film was shown apart from a College Day and without a representative of the University in attendance. In addition, the film was presented on seven occasions in six other states.
5. Cooperation with other colleges and universities in Illinois is being strengthened through work on mutual problems, especially work on improved articulation of curricula and of counselling. In addition, on numerous occasions other colleges have requested the University to provide personnel to make available professional counsel and advice with regard to a number of problems, such as the organization of a new junior college or the expansion of an existing junior college. Particular attention has been focused during the past year on cooperation with junior colleges on problems incident to the articulation of curricula, the organization of new junior college programs, and the provision of financial aids to superior students who transfer from junior colleges to the University.

#### SUMMER ORIENTATION PROGRAM FOR NEW STUDENTS

A pilot program of orientation and program counselling was initiated at Urbana in June, 1959, for a representative group of new freshmen. The program was designed to serve students more adequately than heretofore and to prevent some of the errors in judgment that occasionally occur during the rush of program counselling and registration in the Fall. The program was modified for implementation in May - August, 1960, to try to provide opportunities for students to complete, in one trip to Urbana, all of the steps necessary prior to New Student Week in September.

## DISTRIBUTION OF GRADE REPORTS

During the past year grade reports were sent to freshmen and sophomores, to their parents, and to high school principals of schools from which the students were graduated. One class will be added each year for the next two years so that at the end of two years all undergraduate students will be receiving such reports.

Prior to 1952 the University sent freshmen academic records to the principals of high schools from which the students were graduated. This practice was discontinued following the school year 1951-52 because of budgetary curtailments.

## VETERANS EDUCATIONAL BENEFITS

The personnel and functions of the Veterans Educational Benefits Office were transferred in September, 1958, from the Division of Special Services for War Veterans to the Office of Admissions and Records.

The staff of the Veterans Educational Benefits Office continues to process all benefits for veterans attending the University under Public Laws 550, 634, 857, and 894. This load is rapidly decreasing. As it decreases, the staff is assuming increasing responsibility for selected normal functions of the Office of Admissions and Records, such as the determination of residency status, and scholarship responsibilities related to State Military Scholarships, the Work-Scholarship Program, the Grants-in-Aid Program, and the County Scholarship Program.

Data concerning the number of students who received veterans educational benefits during the past year are included in Table 11.

## INCREASES IN APPLICATIONS FOR ADMISSION

On July 29, 1960, applications for admission and permits to enter in September, 1960, at Urbana and the Chicago Undergraduate Division were up about 30 percent over a comparable date last year. It is difficult, at this time, to determine the effects of these increases on enrollments. When all factors are considered, it is estimated that the enrollment at Urbana in September, 1960, will be approximately 22,500, the number projected earlier for September, 1961, and the enrollment at the Chicago Undergraduate Division will be about 4,500, the number projected for September, 1960.

The following paragraphs provide a summary of enrollment and related facts for the past year. Detailed data enlarging upon this summary are presented in Tables 1 through 12.

TOTAL ENROLLMENT  
(Tables 1, 2, 3, and 4)

The total enrollment for each of the three sessions of the year as compared with the same session of the previous year has been as follows:

	Summer Session		First Semester		Second Semester	
	<u>1959</u>	<u>1958</u>	<u>1959-60</u>	<u>1958-59</u>	<u>1959-60</u>	<u>1958-59</u>
Urbana	6242	6272	20219	19476	18918	17863
Chicago Professional Colleges	533	326	2218	1997	2072	1884
Chicago Undergraduate Division	1129	1176	4067	3852	3452	3269
Extramural Courses	619	645	3778	3678	3797	3782
Agriculture Short Courses	<u>-</u>	<u>-</u>	<u>-</u>	<u>-</u>	<u>84</u>	<u>76</u>
Total	8523	8419	30282	29003	28323	26874

It will be seen that the total enrollment was larger this year than last year in all sessions. There were 104 more students registered in the summer, 1279 more in the first semester, and 1449 more in the second semester than for corresponding periods a year ago. Included in the summer session increase are 179 Interns and Residents at the Chicago Professional Colleges. Data for this group was not available in previous years.

The total enrollment for the year (number of different students who have attended the University during any of its sessions) was 39,791 (see table 4). The similar figure for the preceding year was 38,251. There has been an increase since last year, therefore, of 1540. The totals for all campuses and Extramural courses for this year and last year (including summer sessions) with percentages of increase or decrease are indicated as follows:

	<u>1959-60</u>	<u>1958-59</u>	<u>Percent of Increase or Decrease</u>	
Urbana	24833	23911	+	3.85
Chicago Professional Colleges	2293	2074	+	10.56
Chicago Undergraduate Division	5752	5583	+	3.03
Extramural Courses	7801	7605	+	2.58
Agriculture Short Courses	84	76	+	10.53
Deduct Duplicates*	(972)	(998)		
Total, University	<u>39791</u>	<u>38251</u>	+	<u>4.03</u>

\*Students who attended more than one branch of the University during the year.

ENROLLMENT BY COLLEGE  
(Table 4)

The increase or decrease in enrollment as compared to last year by colleges and schools of the University has been as follows:

Urbana - Winter Session\*

Agriculture	+ 42
Aviation	- 12

Correction for Duplicates*	No Change
Total Increase - Net	+ 1540

#### ENROLLMENT BY MEN AND WOMEN

There were 28,420 men and 11,371 women enrolled at the University this year. Our enrollment has been, therefore, 71.42 percent men and 28.58 percent women. The number of men at the University has increased by 584 (or 2.10 percent), and the number of women has increased by 956 (or 9.18 percent) in comparison with the enrollment of last year. The percentages of men and women at the various locations are as follows:

	<u>Men</u>	<u>Women</u>
Urbana	71.98	28.02
Chicago Professional Colleges	85.48	14.52
Chicago Undergraduate Division	77.89	22.11
Extramural	60.04	39.96
Agriculture Short Courses	98.81	1.19

#### ENROLLMENT BY CLASS, UNDERGRADUATE (Table 5)

Table 5 gives the registration by classes for the winter session in the undergraduate colleges and schools with percentages indicated. The classification is based on each student's most recent registration. In the departments of the University at Urbana, 31.70 percent of the enrollment was in the freshman year, 19.48 percent in the sophomore year, 20.04 percent in the junior year, and 27.21 percent in the senior year. Unclassified and irregular students made up the remaining 1.57 percent.

At the Chicago Undergraduate Division, 62.83 percent were freshmen, 35.89 percent were sophomores, and 1.28 percent were unclassified or irregular.

For the entire University, the percentages of non-professional undergraduate students were as follows: Freshmen, 38.98 percent; sophomores, 22.69 percent; juniors, 15.61 percent; seniors 21.21 percent; unclassified and irregular, 1.51 percent.

#### ENROLLMENT OF NEW STUDENTS (Table 6)

Exclusive of non-credit Extramural courses, 36,249 different students have attended the University during the year. Of these 22,324 had attended the University previously, and 13,925 were admitted this year for the first time. This is 817 more new students than enrolled a year ago. New students at Urbana numbered 8132; at the Chicago Professional Colleges, 514; at the Chicago Undergraduate Division, 3113; in Extramural course, 2091; and in the Agriculture Short Courses, 75. Of these 13,925 new students, 8010 (58 percent) came directly from high school.

\*Students who attended more than one branch of the University during the period covered.

ENROLLMENT OF RESIDENT  
AND NON-RESIDENT STUDENTS  
(Table 7 and Charts)

Among the 28,772 students registered on the three major campuses and in credit Extramural courses during the First Semester, 24,922 (86.62%) listed a home address in the State of Illinois; a year ago the percentage was 87.03. Every county was represented. Another 2850 came from other states plus the District of Columbia. There were 10 students from United States territories or possessions (Canal Zone, Puerto Rico, and Virgin Islands) and 990 students from 78 different foreign countries.

ENROLLMENT OF BEGINNING FRESHMEN  
(Table 8)

A total of 4602 students were admitted at Urbana as beginning freshmen directly from secondary schools during the Winter Session, 1959-60. This is contrasted with 4022 who were admitted a year ago representing an increase of 580 or 14.42 percent. At the Chicago Undergraduate Division, 2489 beginning freshmen were admitted as against 2331 a year ago for an increase of 158 or 6.78 percent. At Urbana, 49.52 percent of the beginning freshmen came from the top quarter of their high school classes as compared to 47.87 percent a year ago. Only 5.00 percent came from the lowest quarter as against 5.96 percent a year ago. At the Chicago Undergraduate Division, 32.66 percent of this years class were top quarter students while a year ago the percentage was 33.19 percent; 9.94 percent were from the lowest quarter compared to 11.00 percent last year. It would appear from these figures that the 1959-60 freshman class on both campuses was of a higher quality scholastically, based on the high school record, than the freshman class of the previous year.

MARRIED STUDENTS  
(See Table 10)

On the Urbana campus for the first semester, out of a total enrollment of 20,219 students, 4,408 were married. This represents 21.80 percent of the student body. Last year the percentage was 22.86 percent. Other percentages of married students were as follows:

	<u>First Semester 1959-60</u>	<u>First Semester 1958-59</u>
Freshmen -	2.69	3.15
Sophomores -	7.39	8.77
Juniors -	13.32	15.85
Seniors -	26.98	29.59
Graduate -	54.30	53.43
Veterans -	66.77	61.35
Men -	24.73	26.01
Women -	13.62	13.73

OTHER TABULAR MATERIAL

In addition to the material mentioned in this summary, the following information is given in tabular form in this report:

Table 11 - Distribution by Year of Birth

## OFFICE OF ADMISSIONS AND RECORDS

Annual Report  
June 1, 1960 - May 31, 1961

## INTRODUCTION

The Office of Admissions and Records has conducted general correspondence with prospective students, has passed upon credentials of students entering the colleges and schools, has supervised their entrance examinations, has had charge of matriculation and registration, has assessed tuition and fees, has kept records of all tuition and fees of students and reported them to the Vice President and Comptroller for collection, has administered the program of undergraduate scholarships, has administered the University Exchange-Visitor Program, has conducted examinations in Illinois for the certificate of Certified Public Accountant, has certified students under Selective Service, and has conducted research on student status and progress. The Office has been the official depository of all academic records. In a number of graduate and professional programs, it has shared with appropriate committees and/or administrative officers responsibility for the approval of the credentials of entering students.

In September, 1956, the Office of Admissions and Records, in cooperation with colleges and departments on the three campuses, launched an intensive program of school and University relations with primary attention focused on improved articulation. In 1958-59, this program was extended to include college-University relations; in 1959-60, the phase related to junior college-University relations was accelerated considerably. In September 1957 and in September 1958, respectively, responsibility for administering the University's programs of College and Career Days and of Veterans Educational Benefits were placed in the Office.

## CHANGES IN ADMISSION AND TRANSFER REQUIREMENTS

The following changes in general undergraduate entrance and transfer requirements were approved:

1. The plan of admission of selected talented secondary school seniors, initiated in the 1959 Summer Session, was extended to permit such students to enroll in extension classes, effective September 1, 1960. In November, 1960, the plan was again extended to include the registration of talented high school seniors in correspondence courses.
2. The regulations pertaining to lowest quarter Illinois students were modified on July 26, 1960, to become effective September 1, 1961, to require such students to demonstrate through examinations their readiness for University work or to defer for one year their admission. The same requirement will be applied to students who are in the lower half of their classes, effective September 1, 1963.
3. A program of progressive admissions was approved on July 26, 1960, to become effective September 1, 1961, based upon the principle that the best qualified students, those who are most likely to succeed and graduate, should be given top priority in admission.

The following changes in college admission requirements were approved:

1. The requirements for admission to the College of Engineering were modified on January 20, 1960 to include, in addition to present requirements, effective September 1, 1963, (1.1) two units in the social studies, (1.2) two units in one foreign language, (1.3) two units in science, and (1.4) a total of  $12\frac{1}{2}$  academic units, rather than the present nine.
2. The foreign language requirements for admission to the College of Liberal Arts and Sciences and to the Art and Music curricula in the College of Fine and Applied Arts were modified, on November 18, 1959, to become effective September 1, 1964, (2.1) to stipulate that the two units of high school language may no longer be waived for students who are in the upper half of their high school classes, and (2.2) to specify that the two units may be in any language in which the University offers instruction, thereby adding Portuguese and Russian to the approved list.  
  
The foreign language requirement for admission to these curricula was further modified on April 19, 1961, effective immediately, to permit acceptance of two units in any one foreign language taken in an accredited high school. Alternatively, the language requirement may be fulfilled by passing entrance examinations in two units in any one foreign language which is regularly taught in the University.
3. The basic knowledge requirements for admission to the College of Liberal Arts and Sciences were modified on January 20, 1959, effective September 1, 1961, (3.1) to make it unnecessary for students entering the general curriculum who lack one unit in American History in high school to take History 151 and 152, and (3.2) to stipulate that one unit of high school algebra and one unit of high school plane geometry, or their equivalents, are non-waiver requirements for admission.
4. On February 24, 1960 the premedical requirements for admission to the College of Medicine were increased from 88 to 94 semester hours for all students beginning their pre-medical training in September, 1962.

#### DEPOSIT ON TUITION AND FEES

A deposit of \$30 on tuition and fees was approved on July 26, 1960, to become effective in September, 1961, for undergraduate students, except foreign students living outside the United States. The deposit was considered essential to assure adequate housing, instruction, and classroom and laboratory space for students who are admitted and who are firmly committed to entering the University.

## STUDENTS DENIED ADMISSION

A total of 2,344 students were denied admission in September, 1960, to graduate and undergraduate programs at Urbana, to the Chicago Professional Colleges, and to the Chicago Undergraduate Division. The reasons for such denials are indicated on Chart 1, "Admission Denials by Reason, First Semester, 1960-61, All Campuses."

A total of 14,844 new applicants were issued permits to enter the University on the three campuses; 10,357 of these registered.

## UNDERGRADUATE SCHOLARSHIP PROGRAM

During the past year 3,656 students held tuition-waiver scholarships worth \$590,867. (See Table 12A). This represents an increase over the previous year of 254 scholarships with a value of \$57,472.\* The principal increase was in Military Scholarships due to the decline in aid under the C.I. Bills. Illinois Veterans not receiving aid from the Veterans Administration apply for the State Military Scholarship which covers tuition. Some of the increase was also due to an increased number of County Scholarships authorized on the basis of the 1960 census and continued growth in the Junior College and Work Scholarship programs.

Special cash scholarships with a value of \$241,188 were awarded to 952 students. (See Table 12B). The average award was \$255. The previous year 885 students received cash scholarships worth \$224,993, an average of \$255 per scholarship. Scholarship funds were received from 144 sources this year as compared to 134 sources last year.

The Grants-in-Aid Program made available an additional \$154,954.

The following sources of funds were available for the first time in 1960-61 to support scholarships in any field of study: General Electric College Bowl, University of Illinois Foundation - Stanley Boggs, and Ann J. Voodry. New funds for scholarships in special areas of study were provided by the following: Fred Herndon--Agriculture; National Secretaries Association--Commerce; Auto Manufacturing Association--Education; UIF Agnes Sloan Larson and UIF Earl J. Wheeler--Engineering; Illinois Health Improvement Association--Physical Education.

The major increase in cash scholarship funds came from the following sources: General Undergraduate--\$9,400 to \$11,700; J. E. & B. F. Hunter--\$4,450 to \$5,400; National Merit-Unrestricted--\$1,250 to \$2,650; La Verne Noyes--\$5,650 to \$6,250; G. J. & P. C. Schilling--\$1,000 to \$3,375; and Clara Y. Shaw--\$8,650 to \$26,125. The major loss in scholarship funds occurred in UIF Foundation from \$13,875 to \$5,750 and in H. C. & H. A. Wright from \$11,167 to \$7,367. UIF Foundation funds available for 1960-61 were reduced because part of the allocation for 1960-61 was actually spent for scholarships during 1959-60. The decrease in H. C. and H. A. Wright scholarship funds reflected a decrease in net income from the Wright farms.

The year 1960-61 was the fourth year for the Grants-in-Aid Program in which awards are based on participation in various campus activities. From the \$154,954 received, 14 athletic achievement fund awards were made, totaling \$2,370; 180 additional athletic awards were made totaling \$150,494, under the Big Ten Grants-in-Aid Program, and 11 non-athletic awards were made, totaling \$2,090.

---

\*Based on adjustment of 1959-60 report to show 3402 tuition-scholarships having a total value of \$533,395.

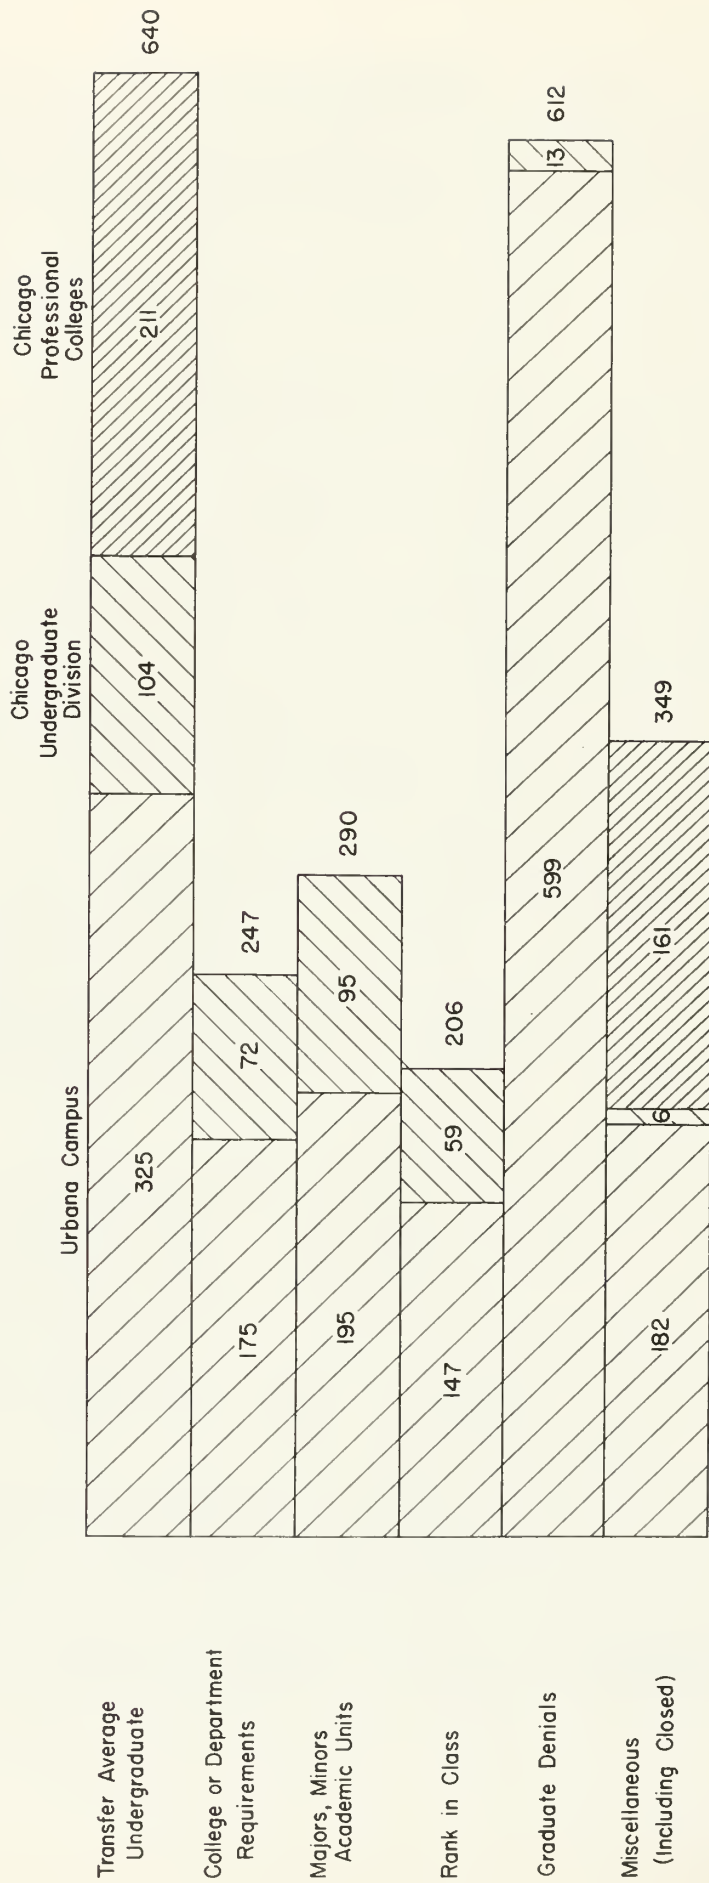

CHART 1

# ADMISSIONS DENIALS BY REASON

First Semester, 1960-1961

ALL CAMPUSES

Total Denied Admission — 2344

Total Accepted — 14,844

Total New Registration — 10,357

May 1, 1961

The funds for undergraduate scholarships continue to be inadequate to meet the need. It is interesting to note that the average value of cash scholarships awarded for 1959-60 and for 1960-61 remained the same at \$255 per scholarship. However, the cost of attending the University, as determined by a study conducted by the University Committee on Student Economics, revealed that costs to students were approximately \$200 more than had been earlier estimated, thus indicating that our scholarships are meeting a decreasing percentage of the cost of attending school.

1960-61 completed the third year under the Illinois State Scholarship Program. We had 735 students in 1960-61 (new awards and renewals) whose fees were paid by the Illinois State Scholarship Commission for a total value of \$151,623. Three hundred and nine students who planned to enter the University in September, 1960, received honorary scholarships from the Illinois State Scholarship Commission.

The University County Scholarship examination held in March in each county in the state attracted 3443 applicants this year, a decrease of 269 from last year.

There were 517 students who received scholarship aid from scholarship funds and money provided by firms and corporations. (See Table 13). Recipients of these particular scholarships were not selected by the University. Eighty-seven firms, funds, and organizations selected the recipients of these scholarships and supported the program with a total contribution of \$172,263. This compares with 422 awards last year which had a value of \$150,479. Among the 87 were the following that gave assistance to 10 or more students. The figures after the name indicate the number of students who received aid from these sources: Fred S. Bailey 89; Evans Scholarship Foundation 80; George S. Pullman Foundation 75; McCourtney Foundation 30; National Merit Scholars 23; National Science Foundation 19; Mellinger Educational Foundation 13; Jewel Tea Company 12; William J. Cook Scholarships 11; Mortar Board Scholarships 10.

A recapitulation of the data presented in Tables 12, 12A, 12B, 13, 14, and 15 indicated that the following scholarships were awarded in 1960-61:

3656	Tuition-Waiver Scholarships	\$ 590,867.00
952	General and College Scholarships	241,188.00
205	Grants-in-Aid	154,954.00
735	Illinois State Scholarships	151,623.00
517	Scholarships - Outside Agencies (Urbana and Chicago Undergraduate Division)	172,263.00
97	Scholarships - Outside Agencies (Chicago Professional Colleges)	19,638.00
<u>1321</u>	Veterans Administration Aid	<u>1,201,419.00</u>
7983	Total	\$2,531,952.00

#### STEPS TAKEN TO ENCOURAGE SUPERIOR STUDENTS TO ATTEND THE UNIVERSITY

A number of steps taken during the past year to encourage superior students to attend the University follow:

1. The Progressive Admissions Program was implemented for those entering the University in September, 1961. This program is based upon the principle that the best qualified students, those who are most likely to succeed and graduate, should be given top priority in admission up to a certain date. After that date, the next best qualified are admitted, again up to a certain date. If space is available following this second date, the best

qualified of those remaining are admitted until all facilities are exhausted.

This program was adopted because available University facilities are inadequate to provide for all qualified applicants for admission.

2. The Advanced Placement Program, sponsored by the College Entrance Examination Board, was approved by the University several years ago. Revisions during the past year assure participating candidates earning examination scores of 5 or 4 of appropriate advanced placement and of college credit equal to that given for equivalent course work at the University. High schools are encouraged to participate in this program. They are doing so in increasing numbers each year.
3. The Early Admissions Program for Talented Secondary School Seniors was expanded. The performances of all students who have participated in this program have been uniformly superior.
4. Interest in the Early Admissions Program in Music has developed steadily since its inception in the summer session of 1959. Again, all students who have participated have performed in a superior manner.
5. A special bulletin on "Opportunities for Superior Undergraduate Students at the University of Illinois" was published and distributed to students and schools in Illinois.
6. In conferences held throughout the state on School-University Relations and in College Day programs sponsored by the University, increased attention has been focused upon the opportunities available in the University for superior undergraduate students.
7. Scholarships for students entering the University are now awarded at an earlier date than in other years.
8. The James Scholars Program was expanded to include a larger number of students and to provide increased opportunities for them.
9. A National Science Foundation Digital Computer Training Program was offered to ten outstanding undergraduate students during the 1961 Summer Session. The ten participants were selected from more than 60 applicants from various parts of the United States and Canada.
10. The Illinois Federation of Woman's Clubs, in cooperation with the University of Illinois Department of Art and the University Extension Division, has sponsored since 1950 two sessions each summer of one-week art schools for selected high school juniors and seniors.
11. Professor Jerry S. Dobrovolsky has continued to supervise the National Science Foundation's Summer Science Training Program for high ability secondary school students. Forty-one students attended this program during the 1961 Summer Session, with thirty of them receiving partial or complete support by subsistence grants.

#### QUALITY OF NEW FRESHMEN IS IMPROVING

The quality of the student body is improving steadily. The best single index of ability to carry University work is the rank of a student in his high school graduating class.

There has been a steady increase on the Urbana campus in the percentage of beginning freshmen who are from the highest quarter of their high school graduating class--the percent was 47 in 1953 and 50 percent in 1960. (See Chart 2). Students from the top half of their classes make up 79 percent of our new freshmen--an increase of 4 percent in seven years. The number from the lowest quarter decreased from 8 percent in 1953 to 5 percent by 1960.

## IMPROVED ARTICULATION

The University staff has long been active in many types of school and University relations through all or nearly all of its schools and colleges. During the past five years these activities have been intensified, with primary emphasis focused on improved articulation.

Specific steps which have been taken to improve the preparation of students for University work and their orientation in the University, and to otherwise improve articulation between high schools and the University and between colleges and the University, follow:

1. Cooperation with the Illinois Association of Secondary School Principals and the Illinois Association of Junior Colleges was strengthened five years ago through the appointment of a Joint Committee of the Illinois Association of Secondary School Principals and the University of Illinois on School and University Relations. The members have been influential in coordinating school and University relations generally, with particular emphasis on improved articulation.
2. Two conferences were held in 1960-61 on the Urbana campus and one at the Chicago Undergraduate Division in which principals, teachers, and counselors from 170 Illinois high schools, University administrators, counselors, and teachers, and University students who were graduates of the 170 high schools conferred. The specific purposes of the conferences were to enable school and University personnel to cooperate in (a) identifying specific problems which students face in their transition from high school to the University, and (b) formulating definite steps which the University and the high schools should take to help students make the transition from high school to the University.

The evidence indicates that conferences are an effective means of reducing the gap between high schools and the University.

3. One Junior College-University Articulation Conference was held on the Urbana campus in which superintendents, junior college deans, teachers, junior college students, and University transfer students from the 24 Illinois junior colleges participated. The purposes of the Conference were (a) to provide means for junior college officials to confer with University transfer students from junior colleges in order to identify specific problems encountered by the students at the University, (b) to provide an opportunity for the visiting junior college students to confer with selected University personnel and to become familiar with the University campus, and (c) to provide a means for junior college personnel to confer with selected University personnel concerning the coordination of the various subject-matter areas.
4. Potential University students conferred with one or more representatives of the staff of the University in 210 College Day, College Night, and Career Day Programs during the past year. Three hundred and eighty-nine schools participated in these programs. The programs enlisted the cooperation on one or more occasions of 201 members of the faculties from our three campuses. In addition, representatives of the University conferred with potential students in 14 meetings sponsored by the University of Illinois Dads Association.
5. In addition to the College Day, College Night, and Career Day Programs, the University initiated programs in 33 Illinois secondary schools from which a great number of graduates enroll at the University. University personnel visited each of the selected secondary

schools conferring individually and in small groups with juniors and seniors who expect to attend the University after graduation from high school. Interview situations were set up by the secondary school counselors which enabled the University representatives to assist the secondary school students in matters relating to higher education in general and to the University in particular. It is planned to expand this program to include additional secondary schools during the 1961-62 academic year.

6. The film on "Student Life at the University of Illinois" was presented in 45 high schools in Illinois. The film "Voices of a Great University" was presented in 23 Illinois high schools. In most instances, the films were shown apart from a College Day and without a representative of the University in attendance. In addition, these films were presented on 21 occasions in 12 other states.
7. Cooperation with other colleges and universities in Illinois is being strengthened through work on mutual problems, especially work on improved articulation of curricula and of counseling. In addition, on numerous occasions other colleges have requested the University to provide personnel to make available professional counsel and advice with regard to a number of problems, such as the organization of a new junior college or the expansion of an existing junior college. Particular attention has been focused during the past year on cooperation with junior colleges on problems incident to the articulation of curricula, the organization of new junior college programs, and the provision of financial aid to superior students who transfer from junior colleges to the University.

#### SUMMER ORIENTATION FOR NEW STUDENTS

The pilot program of summer orientation initiated at Urbana in the summer of 1959 on a limited scale was expanded in the summer of 1960. The New Student Week Committee maintained an information table in the main lounge on the first floor of the Illini Union Building during the period from June 6 to August 12 of 1960. One of our outstanding seniors was on duty from 9:00 a.m. to 5:00 p.m. daily, Monday through Friday, to provide general information, to answer specific questions of visiting students and parents, and to arrange appointments with various University officials, as requested. At a daily luncheon meeting, and following, various representatives of departments concerned with services to new students were present to answer questions. The service proved so worthwhile and helpful that it has been continued and expanded during the period of the 1961 eight-week summer session.

Students have been continually urged to take advantage of the opportunities provided to complete during the spring and summer as many as possible of their pre-enrollment obligations, and many of those who have done so have benefitted notably by early testing, early program counseling, early physical examination, and early housing arrangements. The summer testing facilities have been improved by reciprocal arrangements made with the other state-supported institutions which has greatly increased the number of testing centers and sessions available to the students.

In September, 1960, under the direction of the offices of the Dean of Women and Dean of Men and with the cooperation of the New Student Week Committee, a system of "Illini Guides" was instituted as a substitute for the "Student Advisers" of previous years. Most of these students performed their assigned functions with enthusiasm and efficiency, and succeeded in smoothing considerably the registration process for the new students. In order to assure the most effective service possible from this group, a two-day workshop was organized for Illini Guides at Allerton Park on May 13 and 14, 1961. This workshop

was financed by the New Student Week Committee and some of the participating housing units and conducted under the general supervision of the offices of the Dean of Men and Dean of Women, and it promises to contribute to a greatly improved New Student Week program in September, 1961.

Incoming freshmen have been contacted and urged to read at least two books from a suggested list before coming to the campus this fall. These books are to be the basis for discussion in the "Student-Faculty Forum" groups during New Student Week and as a topic source for the Rhetoric themes required of all freshman students during the first two weeks of class.

For many years the University Dad's Association has sponsored each spring and summer a series of Student-Parent meetings throughout the State which were designed to cultivate favorable public relations between the University and the parents of prospective students. This program was continued this year, but it was supplemented during the eight-week Summer Session by a series of informal meetings arranged particularly for visiting parents. Beginning with a coffee and social period at 10:30 a.m., representatives of various University offices, members of the teaching faculty, and selected students participated in a panel discussion of University requirements and procedures. Individual questions were encouraged.

Following the luncheon break, the parents were taken on a conducted tour of the campus which enabled them to see a large percentage of the present completed buildings, as well as those currently under construction.

Parental comments received following attendance at this program were overwhelmingly favorable and indicated the parents' appreciation of the courteous hospitality shown and the efforts made to provide them with the true picture of the University of Illinois, and to assure them that the great size of the institution in no way detracts from the personal attention and help provided for the individual students. It is anticipated that this program will continue to develop in future years.

#### DISTRIBUTION OF GRADE REPORTS

During the past year grade reports were sent to all undergraduate students, to their parents, and to high school principals of schools from which the students were graduated. The original schedule called for only freshmen, sophomores, and juniors to be included in this distribution this year with seniors to be added in 1961-62. The seniors were added a year ahead of schedule, however, in order to cooperate in a study being conducted by the Statistical Service Unit and the College of Liberal Arts and Science. This study is preparatory to a significant expansion of services to the colleges in 1961-62 by the Office of Admissions and Records and the Statistical Service Unit. These services will involve the use of new electronic equipment installed in the Statistical Service Unit in July, 1961, to provide reports more quickly than heretofore; moreover, more detailed reports will be provided of grades to the colleges and, in addition, an identification of students who are liable to probation or drop action.

Prior to 1952 the University sent freshmen academic records to the principals of high schools from which the students were graduated. This practice was discontinued following the school year 1951-52 because of budgetary curtailments.

#### VETERAN'S EDUCATIONAL BENEFITS

The staff of the Veterans Educational Benefits Office now processes all benefits for veterans attending the University under Public Laws 590, 634, 857, and 354. This load is rapidly decreasing. As it decreases, the staff is assuming increasing responsibility for selected normal functions of the

Undergraduate Scholarship Office, such as responsibilities related to State Military Scholarships, the Work Scholarship Program, the Grants-in-Aid program, and the County Scholarship Program.

Data concerning the number of students who received veterans educational benefits during the past year are included in Table 14.

#### INCREASES IN APPLICATIONS FOR ADMISSION

A total of 17,193 undergraduate and graduate students applied for admission at Urbana in September, 1960, contrasted with 13,906 in 1959, an increase of 23.63 percent. At the Chicago Undergraduate Division, 4,082 undergraduate students applied in 1960, whereas 3,180 applied in 1959, an increase of 28.36 percent.

#### EXAMINATIONS IN HIGH SCHOOL AND COLLEGE SUBJECTS

The University has administered, for some time, three types of examinations in high school and college subjects:

- a. Entrance examinations to applicants for admission to the University who are not graduates of accredited high schools or are deficient in some high school subjects.
- b. High school examinations for persons who seek to qualify for admission to the study of law; and
- c. Examinations in college subjects (pre-legal), also for applicants who wish to qualify for the study of law.

The entrance examinations were established by the Board of Trustees in the first year of the University primarily as a means of qualifying for admission to the University and these examinations have been offered since that time.

A supplementary high school examination program was approved in the academic year 1917-18 by the Board of Trustees to assist applicants for admission to the examinations for the certificate of Certified Public Accountant to meet educational requirements, and later to provide a method students might use to make up high school deficiencies prior to studying law. The standards of the two sets of high school examinations are the same; credit earned in either may be used for admission purposes or qualification for the preliminary requirements for pre-legal studies.

In the fall of 1917, as a result of an agreement with the State Board of Bar Examiners, the University began offering periodic high school examinations in Chicago to enable pre-legal candidates to comply with a rule of the Supreme Court of Illinois that a pre-legal student either must have graduated from high school or present evidence that he had the equivalent of a high school education by passing examinations in standard high school subjects.

The number of enrollees for the high school and college subject pre-legal examinations has been steadily decreasing and in view of this the All-University Committee on Admissions and the Dean of Admissions recommended that:

Effective February 1, 1962, the University discontinue giving high school and pre-legal examinations to persons who are not using them for admission purposes.

Effective February 1, 1962, the University limit the number of entrance examinations offered to the following subjects: English composition and rhetoric, one or two years (ordinarily offered in the eleventh or twelfth grades of secondary schools); elementary algebra, one year; plane geometry, one year; Spanish, one or two years; French, one or two years; German, one or two years; Latin, one or two years; modern European History, one year; and other subjects approved by the Office of Admissions and Records. Students who wish to take entrance examinations will be given tests selected by the Office of Admissions and Records, or prepared under the supervision of the Office of Admissions and Records.

These recommendations were approved.

## GROWTH IN UNIVERSITY ENROLLMENT

The University enrolled 77 students during its first year, 1867-68. This number increased to 32,129 during the past year. A tabulation of first semester enrollments by years and campuses follows:

Year	Urbana	Chicago Professional Colleges	Total	Year	Urbana	Chicago Professional Colleges	Total
1867-68	77		77	1902-03	2113	1039	3152
1868-69	126		126	1903-04	2261	1015	3276
1869-70	180		180	1904-05	2483	929	3412
1870-71	278		278	1905-06	2734	856	3590
1871-72	381		381	1906-07	2998	744	3742
1872-73	400		400	1907-08	3307	789	4096
1873-74	405		405	1908-09	3506	836	4342
1874-75	373		373	1909-10	3677	792	4469
1875-76	386		386	1910-11	3776	814	4590
1876-77	388		388	1911-12	3710	860	4570
1877-78	404		404	1912-13	3772	176	3948
1878-79	416		416	1913-14	4041	794	4835

## FURTHER MECHANIZATION AND PROCEDURAL CHANGES

During the past year numerous steps have been taken to mechanize further the operations of one or more of the three Offices and to improve upon procedures utilized. A number of these steps follow:

1. A highly mechanized procedure for posting records is now used.
2. Autotypists have been installed and are used for issuing certain personalized letters in large quantities.
3. A mechanized procedure for reporting scholastic averages to the college offices at the close of each semester has been developed in cooperation with the other offices concerned.
4. A process of simultaneous preparation of permit to enter and permanent record has been devised and put into operation.
5. Xerox photography is now used for the mass duplication of permanent records.
6. The Progressive Admissions Program was established and implemented with the cooperation of other offices concerned.
7. Central Processing Units have been established to accelerate and improve upon efficiency in processing applications for admission.
8. A night shift was tried during a "rush" period for several months. It proved to be more economical and efficient than a program of overtime.
9. An increased number of students are granted pre-registration privileges, including students who receive honors at the Honors Day Convocation and those registered in the James Scholar Program, thus allowing the students a greater possibility of registering in courses and sections of their choice.
10. The registration procedure has been improved by means of adjustments in scheduling.
11. Test results of the American College Testing Program, the College Entrance Examination Board, and the Freshman Guidance Examinations have been applied in cases where it would benefit the student in the implementation of the Progressive Admissions Program.
12. All admission applications and vault envelopes are now filed numerically and the student is issued this number as his identification number for all periods of attendance. This number is also used by other offices to identify the student.
13. The admissions application is a four-page folder which also serves as a file folder during admission and initial registration procedures and thus obviates the necessity to prepare file folders for applicant's records, expedites the filing process, and reduces the chances of mis-filing.

#### STUDIES OF STUDENT CHARACTERISTICS AND ACHIEVEMENT

In addition to the usual studies conducted each year on such items as the number of students placed on probation or dropped and the quality of entering students, the Office cooperated with other agencies of the University in preparing eleven studies on "The Entering Undergraduate Student" for the use of the President's Faculty Conference and of the University Study Committee on Future Programs. These studies were concerned with the following topics:

##### Study:

1. After high school, what?
2. College choices of State Scholarship winners
3. Scholarship opportunities
4. Admission requirements and admissions experience
5. Quality of the freshman class as a whole
6. Characteristics of entering freshmen by colleges
7. Educational history of freshman entrants
8. Factors associated with achievement of able students
9. Characteristics and educational history of transfers
10. How superior students view their University
11. How the faculty views the Illinois student

#### STUDY OF STUDENT ECONOMICS

The Office cooperated with other agencies of the University in conducting a study of Student Economics under the direction of the University Committee on Student Economics.

The purposes of the study were (1) to determine the expenditures of students attending the University, including costs of all items; (2) to determine the revenues of such students, including the amounts received from all sources; (3) to determine the assets of students, including the sources of the assets; and (4) to determine the debts of students, including the amounts and the purposes for which the debts were incurred. These data would, it was proposed, provide the University with information upon which to base policy decisions regarding changes in tuition charges, the need for increased loan and scholarship funds, the need for an increased number of part-time jobs for students, and related items concerning student economics. The University wished to know, as completely as possible, the financial conditions surrounding students' attendance so that University plans could take them into account.

#### RESEARCH PROJECT ON THE AMERICAN COLLEGE TESTING PROGRAM (ACT)

When the ACT Testing Program was first inaugurated, the tests, and the services which were proposed to be offered with them, seemed to offer considerable promise to the University as possibly meeting some of its needs for test information about incoming students for purposes of admissions, scholarship-selection, counseling, and placement. The University was particularly concerned about

reducing the demands on high schools and high school students for multiple testing programs. Other Illinois state-supported universities also had been concerned for some time with bringing about greater uniformity in their testing programs so as to reduce multiple testing demands on students.

Since the ACT Testing Program was new, however, there was a dearth of solid evidence about the usefulness and satisfactoriness of the tests for the purposes for which the University--and all of the Illinois state-supported universities--would want to use them.

A cooperative state-wide research project was, therefore, established, aimed at evaluating the possible usefulness of the ACT tests for all of the state-supported universities.

Computer time and some card-processing expense for the project were contributed by the ACT organization, while the individual institutions contributed many hours of labor in data-supplying activities. Overall supervision of the project was contributed by the University of Illinois.

The ACT Research Project is essentially a study of the students who entered the University in September 1960. The data analyzed for these students included:

1. ACT test scores (both those submitted to the University routinely as a result of the University's tentative informal participation in the ACT program for two years and those obtained through a special research make-up testing in September 1960).
2. All freshman test battery scores, as obtained from the Student Counseling Services on the Chicago and Urbana campuses.
3. Placement test scores in rhetoric, mathematics, chemistry, and biology.
4. College Entrance Examination Board scores (available only for a portion of the total research sample, either as a result of being furnished routinely by students or resulting from small special research testings in September 1960).
5. College Qualification Test scores (the test currently used in the competitive County Scholarship examination program).
6. Grade-point average at the end of the first semester, and grades in some individual courses in rhetoric, mathematics, chemistry, biology, and engineering drawing.
7. End-of-semester status (withdrawn, dropped, probation, clear status, etc.)

Grade-point averages at the end of the second semester, and end-of-year status data.

#### PRE-ENTRY TESTING

The All-University Committee on Admissions recommended, following an analysis of the findings of the research referred to in the preceding section, the following program of pre-entry testing:

##### A. Requirement

1. Each student applying for admission to the University of Illinois direct from secondary school will be required to furnish to the University scores on the test battery administered by the American College Testing Program (ACT). However, a student may submit the Scholastic Aptitude Test (SAT) scores of the College Entrance Examination Board (CEEB) with the understanding that his admission will be based on these scores. A student who submits SAT scores will still be required to submit ACT scores as early as possible following the receipt of a permit to

enter and no later than one month after registration so that the University may have uniform data for entering students.

2. Each such applicant taking the ACT tests in Illinois will be required to complete also the Strong Vocational Interest Blank, as administered by the ACT Program in Illinois. The information obtained from this blank will be used in conjunction with other tests for counseling purposes, and will not affect the eligibility for admission of any student.
3. These requirements will be effective beginning with applications for admission to the 1962 summer session.

#### B. Purposes

It is the stated purpose of the University to encourage multiple use of the test data referred to above in order to reduce as much as possible the need for multiple testing demands on high school students and staff:

1. The scores will be used as a supplement to rank in high school class for determining priority for admissions action under the Progressive Admissions Plan, in accordance with existing regulations.
2. The scores will be used to determine eligibility for immediate admission of students from the lowest quarter of their high school classes (and from the lower half of their classes beginning in September, 1963), in accordance with existing regulations.
3. The scores will be used, along with other criteria, in connection with such functions as the awarding of scholarships, selection of honors students, counseling, and course placement. It is understood that additional testing will be needed for some of the above purposes.

These recommendations were approved by the University. Also, they have been approved for the most part by the other state-supported institutions of higher learning in Illinois.

## ENROLLMENT DATA

The following paragraphs provide a summary of enrollment and related facts for the past year. Detailed data enlarging upon this summary are presented in Tables 1 through 12.

TOTAL ENROLLMENT  
(Tables 1, 2, and 3)

The total enrollment for each of the three sessions of the year as compared with the same session of the previous year has been as follows:

	<u>Summer Session</u>		<u>First Semester</u>		<u>Second Semester</u>	
	<u>1960</u>	<u>1959</u>	<u>1960-61</u>	<u>1959-60</u>	<u>1960-61</u>	<u>1959-60</u>
Urbana	6520	6242	21955	20219	20102	18918
Chicago Professional Colleges	545	533	2103	2218	2039	2072
Chicago Undergraduate Division	1099	1129	4516	4067	3869	3452
Extramural Courses	482	619	3555	3778	3866	3797
Agriculture Short Courses	-	-	-	-	102	84
Total	8646	8523	32129	30282	29978	28323

It will be seen that the total enrollment was larger this year than last year in all sessions. There were 123 more students registered in the summer, 1847 more in the first semester and 1655 more in the second semester than for corresponding periods a year ago.

The total enrollment for the year (number of different students who have attended the University during any of its sessions) was 43,138 (see Table 1, part 4). The similar figure for the preceding year was 39,791. There has been an increase since last year, therefore, of 3,347. The totals for all campuses and Extramural courses for this year and last year (including summer sessions) with percentages of increase or decrease are indicated as follows:

	<u>1960-61</u>	<u>1959-60</u>	<u>Percent of Increase or Decrease</u>	
Urbana	26942	24833	+	8.49
Chicago Professional Colleges	2197	2293	-	4.19
Chicago Undergraduate Division	6341	5752	+	10.24
Extramural Courses	8598	7801	+	10.22
Agriculture Short Courses	102	84	+	21.43
Deduct Duplicates*	(1042)	(972)		
Total, University	43138	39791	+	8.41

ENROLLMENT BY COLLEGE  
(Table 1, Part 4)

The increase or decrease in enrollment as compared to last year by colleges and schools of the University has been as follows:

## Urbana - Winter Session\*\*

Agriculture	+	17
Aviation	+	14

\* Students who attended more than one branch of the University during the year.  
\*\*First and second semester.

Commerce	+	296

Summer Session - All Divisions - Net	+	199
Corrections for Duplicates*	(-	32)
Total Increase - Net	+	3347

ENROLLMENT BY MEN AND WOMEN  
(Table 2, Part 4)

There were 30,507 men and 12,631 women enrolled at the University this year. Our enrollment has been, therefore, 70.72 percent men and 29.28 percent women. The number of men at the University has increased by 2087 (or 7.34 percent), and the number of women has increased by 1260 (or 11.08 percent), in comparison with the enrollment of last year. The percentages of men and women at the various locations are as follows:

\* Students who attended more than one branch of the University during the period covered.

	<u>Men</u>	<u>Women</u>
Urbana	70.71	29.29
Chicago Professional Colleges	85.89	14.11
Chicago Undergraduate Division	76.91	23.09
Extramural Courses	61.61	38.39
Agriculture Short Courses	99.02	.98

ENROLLMENT BY CLASS, UNDERGRADUATE  
(Table 4)

Table 4 gives the registration by classes for the winter session (first and second semester) in the undergraduate colleges and schools with percentages indicated. The classification is based on each student's most recent registration. In the departments of the University at Urbana, 35.14 percent of the enrollment was in the freshman year, 19.54 percent in the sophomore year, 19.87 percent in the junior year, and 23.78 percent in the senior year. Unclassified and irregular students made up the remaining 1.67 percent.

At the Chicago Undergraduate Division, 66.05 percent were freshmen, 32.97 percent were sophomores, and .98 percent were unclassified or irregular.

For the entire University, the percentages of non-professional undergraduate students were as follows: freshmen 42.38 percent; sophomores, 22.23 percent; juniors, 15.40 percent; seniors 18.46 percent; unclassified and irregular, 1.53 percent.

ENROLLMENT OF NEW STUDENTS  
(Table 5)

Exclusive of non-credit Extramural courses, 39,094 different students have attended the University during the year. Of these 23,401 had attended the University previously, and 15,693 were admitted this year for the first time. This is 1768 more new students than enrolled a year ago. New students at Urbana numbered 9495; at the Chicago Professional Colleges 394; at the Chicago Undergraduate Division, 3575; in Extramural courses, 2145; and in the Agriculture Short Courses, 84. Of these 15,693 new students, 9231 (59 percent) came directly from high school.

ENROLLMENT OF RESIDENT  
AND NON-RESIDENT STUDENTS  
(Table 6 and Charts)

Among the 30,796 students registered on the three major campuses and in credit Extramural courses during the First Semester, 26,774 (86.94%) listed a home address in the State of Illinois; a year ago the percentage was 86.62. Every county was represented. Another 2909 came from 48 states plus the District of Columbia, only Alaska not being represented. There were 15 students from United States territories or possessions (Canal Zone, Puerto Rico, and Virgin Islands) and 1098 students from 80 different foreign countries.

ENROLLMENT OF BEGINNING FRESHMEN  
(Table 7)

A total of 5593 students were admitted at Urbana as beginning freshmen directly from secondary schools during the Winter Session, 1960-61.\* This is contrasted with 4602 who were admitted a year ago representing an increase of 991 or 21.53 percent. At the Chicago Undergraduate Division, 2855 beginning freshmen were admitted as against 2489 a year ago for an increase of 366 or 14.70 percent. At Urbana, 48.90 percent of the beginning freshmen came from the highest quarter of their high school

\* First and second semester.

classes compared with 49.52 percent last year and 47.87 percent two years ago. Only 5.43 percent came from the lowest quarter as against 5.00 percent last year and 5.96 percent two years ago. At the Chicago Undergraduate Division, 35.18 percent of the beginning freshmen came from the highest quarter of their high school classes compared with 32.66 percent last year and 33.19 percent two years ago. Only 8.07 percent came from the lowest quarter as against 9.94 percent last year and 11.00 percent two years ago.

#### MARRIED STUDENTS (Table 8)

On the Urbana campus for the first semester, out of a total enrollment of 21,955 students, 4464 were married. This represents 20.33 percent of the student body. Last year the percentage was 21.80. Other percentages of married students were as follows:

	First Semester 1960-61	First Semester 1959-60
Freshmen -	2.71	2.69
Sophomores -	5.20	7.39
Juniors -	12.65	13.32
Seniors -	24.81	26.98
Graduate -	54.47	54.30
Men -	23.10	24.73
Women -	13.18	13.62

#### DEGREES CONFERRED (Table 11)

For the year, a total of 5,516 earned degrees were conferred on both campuses. This is in comparison with 5,430 degrees conferred during the previous year. 5,057 of these degrees were conferred on the Urbana campus as against 4,955 the previous year. Of the Urbana degrees 3,126 were at the baccalaureate level with 1,520 masters and 411 doctors. 459 degrees were conferred at the Chicago Professional Colleges including 415 at the baccalaureate and first professional degree level and 32 masters and 12 doctors. The above degrees were conferred at four different times during the year as follows:

August, 1960	- Urbana	925
	- Chicago Professional Colleges	7
October, 1960	- Urbana	234
	- Chicago Professional Colleges	3
February, 1961	- Urbana	1277
	- Chicago Professional Colleges	1
June, 1961	- Urbana	2621
	- Chicago Professional Colleges	448

Five honorary degrees were conferred at Urbana in June, 1961.

#### OTHER TABULAR MATERIAL

In addition to the material mentioned in this summary, the following information is given in tabular form in this report:

- Table 9 - Distribution by Year of Birth
- Table 10 - Graduate Students by Major Subjects
- Table 12 - Scholarship Data

TABLE 1
